RULES FOR EXAMINATIONS

PASSED BY THE SYNDICATE.

(i) ARTS.

I.—GENERAL.

(a) Appointment of Examiners

1. In May of each year the Syndicate shall appoint gentlemen to set the question papers in all the subjects of the Arts Examinations of the current academical year.

2. No gentleman shall be appointed to set a paper in a subject of which he teaches the whole or a part.

3. Not less than a month before the commencement of the Arts Examinations the Syndicate shall appoint examiners to look over the answer papers of the candidates, and four Head Examiners to superintend the work of the Entrance examiners, one in each of the following subjects :—

(1) English	(3) Sanskrit and Bengali.
(2) Mathematics.	(4) History and Geography

(b) Setting Papers

4. Gentlemen appointed to set the examination papers are requested to write in the margin opposite to each question the maximum number of marks they intend to assign to it.

5. The papers set should be such as candidates can reasonably be expected to answer within the time allotted.

6. The questions in each subject should be fairly distributed over the whole course in that subject and should, as far as possible, conform to the standard of previous years. Where two or more alternative text-books or groups of text-books are prescribed in any subject, the examination questions shall be so framed as to be capable of being answered out of any one of the prescribed text-books or groups of text-books.

7. The examination papers, *in duplicate,* written very legibly on one side only of foolscap paper, are to be sent by post in a sealed and registered double cover to the Registrar at his private residence. No copy of any examination paper is to be retained by the gentleman setting it.

8. When two or more persons are appointed to set papers in any subject for the F. A, B. A. or M. A examination, it shall be their *joint* duty to moderate the papers set by them in consultation with each other, and to see that the papers set by them conform to the conditions laid down by the University for such examination, and that the standard of questions set remains approximately uniform from year to year.

(c) EXAMINATION OF PAPERS.

9 The examiners will be expected to be present in Calcutta during the examination in the subjects for which they have been specially appointed

10. When two or more examiners are appointed to examine answers to the same question paper, they shall meet as soon as possible after the examination to decide upon a uniform system of marking.

They shall elect one of their number to act as Chairman, whose duty it shall be to decide all questions that arise after the meeting of the examiners, and to forward to the Registrar a copy of the rules agreed upon at the meeting

In the case of the Entrance Examination the Head Examiner shall be *ex-officio* Chairman.

11. Each examiner shall be furnished with a roll containing the names and numbers of all the candidates to be examined by him, in which he shall enter the total number of marks assigned to each candidate.

The total number of marks must in every case be a whole number; if the roll submitted by an examiner contains fractional marks, it will be returned to him for correction.

12 The examiners shall mark on each answer paper the marks assigned to each question, as well as the total marks.

13. The examiners will be expected to examine the papers of the candidates in the order in which their names appear in the roll, and at the end of each week to send to the Registrar the pages of the roll containing the marks assigned to the papers examined

14. As soon as the results have been tabulated, the Registrar shall prepare a list of the candidates who have failed in one subject only and in order to guard against any possible inaccuracy their papers in that subject shall be re-examined by the original examiners, or by the Head Examiners, on the method of marking already adopted and without any alteration of the standard.

To facilitate the work of re-examination, the examiners, or the Head Examiners, as the case may be, shall keep the answer papers of the candidates arranged in the order in which their names appear on the roll.

The answer papers shall be returned to the Registrar as soon as the work of re-examination is over.

15. Six weeks before the Arts Examinations take place the Syndicate shall fix the latest date for sending in marks.

If any examiner fails to send in all his marks within the prescribed period, the amount of his remuneration shall be reduced by Rs. 16 for each day by which he exceeds that period.

16 Each examiner shall write his name and the subject of examination at the foot of every page of his roll.

17. No entry shall be made in the roll against the name of any candidate from whom no paper is received

18. Examiners are requested to keep the result of the examination and the marks assigned to candidates *strictly secret*.

19. Not less than a month before the commencement of the Entrance and F. A Examinations the Syndicate shall appoint, from among the representatives of the Faculty of Arts, four Moderators. The Moderators, in consultation with the Registrar, shall be empowered to pass candidates who have failed in one subject only in either of the above examinations, by the addition of grace marks. If the

Moderators and Registrar are not unanimous on any point, it shall be referred to the Syndicate at their next meeting.

20. The examiners for the B. A. and M A. Examinations shall report the results of those examinations in their respective subjects to the Syndicate.

IX.

UNIVERSITY LIBRARY.

Babu Joykissen Mookerjee, of Ooterpara, made a donation of Rs 5,000 to the University, on the 20th July, 1869, for the purpose of forming a Library. The amount was invested in four per cent. securities till the completion of the University building.

In 1874, the sum of Rs 3,500 was added to the Library Fund from the surplus income of the University of that year; and the Syndicate, having thus at their disposal more than Rs 9,000, appointed a Committee to report on the steps it was advisable to take to form a Library. The Committee reported (see Minutes, Vol. XVIII, page 22) that they thought "it desirable to begin with procuring such books as shall render the Calcutta University Library *Supplementary to other Libraries now existing in Calcutta.*" The general principles laid down by the Committee, and the mode of procedure they proposed for adoption, were approved by the Syndicate; and further transfers have, from year to year, been made to the Library Fund from the surplus income of the University. Several instalments of books have been received, and the Library now contains, besides English works of reference, and the chief authorities on Indian antiquities, fairly complete sets of the Sanskrit, Arabic, Latin, French, and German classics. The following Regulations have been approved by the Syndicate :—

Regulations for the Management of the University Library.

Appointment of the Committee.

1. (*a.*) The Library shall be under the management of a Committee consisting of not less than five Resident Fellows of the University, who shall be appointed annually by the Syndicate. The Registrar shall be *ex-officio* Librarian and Secretary of the Committee.

(*b.*) Members of the Committee, who may leave India during their year of office, with the intention of not returning before the end of their time of office, shall be considered to have vacated their membership.

(*c.*) Vacancies which may be caused by the retirement or departure of Members, or otherwise, at any time during their year of office, shall be reported to the Syndicate who may then, at their discretion, nominate other Fellows to the office vacated.

(*d.*) The Syndicate may at any time, at their discretion, appoint additional Members to the Committee.

Powers and duties of Committee.

2. (*a.*) It shall be competent to the Committee to make such bye-laws, rules and arrangements, as they may think fit, for holding meetings and generally for conducting the business pertaining to their office, provided that all such rules and arrangements are consistent

with the provisions of the Act of Incorporation, the Bye-laws of the University, and with these present Regulations.

(b.) The Committee shall decide on the purchase of books with the money placed at their disposal for that purpose by the Syndicate.

(c.) The Committee shall establish a regular and authentic record of all books borrowed from the Library and returned to it, together with the names of borrowers, the dates of borrowing and returning, and such further details as they may deem advisable

Privileges of Fellows.

3. The Library is for the use of Resident Fellows of the University, and they alone have the privilege to use it, subject to the present Regulations and to such further rules and orders as may be agreed to by the Library Committee under Regulation 2 (a.)

Admission of Non-Fellows.

4. (a.) Persons residing in Calcutta, not being Fellows of the University, may receive special permission from the Syndicate to use the library for the purpose of Literary research Such permission will be granted only on the recommendation of the Library Committee.

(b.) In recommending any person to the Syndicate under this Regulation, the Library Committee shall specify in writing for the information of the Syndicate, the grounds on which they base their recommendation.

(c.) Persons not being Fellows of the University may consult the Library for the purpose of literary research, without removing the books from the Library between the hours of half-past ten A.M. and half-past three P.M. on the written recommendation of a Member of the Library Committee to the Librarian, but not otherwise.

Conditions of borrowing and returning books.

5. (a.) Subject to the exceptions specified in Regulation 7, Fellows and other persons allowed to use the Library under Regulation 4 (a) may borrow and temporarily remove such books as they may require, provided that one person shall not at one and the same time have more than ten volumes in his possession on loan from the Library. In this Regulation the term "volumes" shall include pamphlets and parts of works separately sewn.

(b.) No book shall be issued and delivered except to the authorised borrower in person, or to some one having written authority from him to receive it on behalf of the authorised borrower.

(c.) Every volume borrowed shall be returned to the Library within two calendar months of the date on which it was removed from the Library. In case any borrower fails to return any book within this period, a notice shall be sent to him by the Librarian calling for the return of the book.

(d) If a book called for under the previous section be not returned within one week after the receipt of the Librarian's notice, the person who has borrowed the book from the Library shall be subject to a fine of one Rupee for each volume so retained, and to a further fine of an equal amount for each additional week that he may retain it after the expiration of the second week.

I desire that the expense of such printing and distribution may be defrayed out of the residue of the annual interest of the said fund. Whatever portion of the residue may remain after defraying the expenses, I desire that it may be devoted to the printing and publication of approved works on Law or Jurisprudence. It is my will that the said 'Tagore Law Professorship' shall, save as herein provided, be as to the kind of law which is to be taught and in all other matters and things regulated by and subject to the control of the Senate of the said University."

2. Immediately after the subject or subjects shall have been thus selected, advertisements shall be published in such newspapers as the Syndicate may think proper, stating the subject or subjects so selected, and inviting applications from candidates for the professorship.

3. Candidates shall send in their applications to the Registrar on or before the 1st May following, and each candidate shall forward with his application one hundred copies of a brief synopsis of his proposed lectures, and if he so pleases, the same number of copies of his introductory lecture.

4. The copies of the introductory lecture and the brief synopsis so sent shall be referred to a Committee of the Faculty of Law, consisting of five members to be chosen by the Faculty, who shall consider the same and report thereon to the Faculty, who shall recommend a candidate to the Senate for election.

5. The election of the Professor shall take place in the month of August

6. The Professor shall commence to deliver his lectures in the month of November next following his election, and shall complete the delivery thereof in the following January. SIBLEY SCHOLARSHIP.

The late Mr. George Sibley, formerly a Fellow of the University, bequeathed all his shares in the Ghoosery Cotton Mills Company, "Limited," to the Senate of the University "upon trust to found scholarships of the value of Rs 50 per mensem for graduates of the University in Civil Engineering with power to divert from time to time any portion of the income not exceeding an equal moiety in any other way which may, in the opinion of the Senate be better calculated to further the study of Engineering Science among the natives of India." At the time of his death Mr. Sibley owned 225 shares in the above-named Company, their nominal value being Rs. 200 each. Of these, 25 shares had to be sold to meet the claim of the Inland Revenue authorities in England, demanding a legacy duty of 10 per cent of the value of the shares and of the amount of any dividends received or accrued since the testator's death, and to pay the Attorney's bill of cost. The remaining 200 shares, together with dividend warrants for Rs 800, have been made over to the Secretary and Treasurer, Bank of Bengal, with instructions to sell the shares at their present market value, and to invest the sale proceeds and the amount of dividends in the 4 per cent. loan of 1865. The Faculty of Engineering at their meeting held on the 22nd March, 1893, recommended to the Syndicate that out of the interest of the above endowment, one scholarship (to be called the Sibley scholarship) of Rs. 50 a month, tenable for two years, be awarded annually (I) to any B. E. at the end of his practical course who attends and works regularly in an electrical laboratory or in an electrical workshop: or (II) to any B. E. who is *bonâ fide* working in a mine.

The selection of the scholars to be according to their standing in the B. E. examination, and each scholar to be required to submit to the Registrar a certificate of good conduct at the end of each month. The scholarship to be forfeited if the conditions on which it is granted cease to be observed.

The recommendation of the Faculty of Engineering was adopted by the Syndicate at their meeting held on the 8th April, 1893.

II.
Hughli College.

AFFILIATED, 1857.

This institution was founded in 1836, and was originally supported from funds bequeathed by Muhammad Mohsin, a wealthy Muhammadan gentleman, who dying without heirs in the year 1806, left his large property, yielding an annual income of Rs. 45,000 to Muhammadan Trustees "for the service of God." Owing to the misappropriation of the funds Government assumed the office of Trusteeship. The right of assumption was opposed by the original Trustees, but upheld both by the Courts in India and by the Privy Council in England. The period of litigation, extended over many years, during which the annual income accumulated, forming a surplus of Rs. 8,61,100 The surplus was devoted to the foundation and endowment of the Hughli College, and was further increased by a portion of the original zemindaree that became available on the death of one of the Mootawallees of the Hughli Imambarah, an Institution which also derives its support from Muhammad Mohsin's legacy. The College endowment was further increased by the accumulation of unexpended revenue, until the income amounted to Rs. 51,000 per annum. In 1873 the Government of India resolved to transfer the whole of the Mohsin endowment to the purpose of Muhammadan education throughout Bengal, and accordingly increased the provincial assignment for education in Bengal by Rs. 50,000 a year, in order to meet the expenses of the Hughli College, which has now become an Institution maintained by the Government.

The College consists of three Departments, an English, an Arabic, and a Law Department, and is under the control of the Director of Public Instruction, Bengal. The English Department is open to all students who have passed the University Entrance Examination, the fees being two rupees per mensem for Muhammadans up to a limit of 17, and Rs. 6 for all others. In the Law Department the fee is Rs. 5 per mensem for the 1st year class and Rs. 7 for the 2nd and 3rd year classes.

Krishnagar College.

Affiliated, 1857.

This College was founded by Government in 1845, and is under the control of the Director of Public Instruction, Bengal.

Any person who has passed the University Entrance Examination may be admitted. Students pay a monthly fee of Rs. 5.

The College is a handsome building, standing upon 3 bigahs of land, and surrounded by an enclosed compound of upwards of 100 more. It was erected in 1856 at a cost of Rs. 66,876 ; 17,000 of which was collected by private subscription. In consideration of the liberality thus manifested in the district, a donor of Rs. 1,000 is allowed to place a boy, free of expense, at the College in perpetuity, and another, for every Rs. 500 additional he may have subscribed. Part of the ground occupied was purchased by Government ; for the remainder, the College is indebted to the munificence of the Maharaja of Nuddea and the Maharani Swarnamayi, C.I., of Cossimbazar.

In 1871, the B. A. classes (the third and fourth year classes) were abolished by Sir George Campbell, then Lieutenant-Governor of Bengal ; and for some years the College only afforded instruction up to the First Examination in Arts. In 1875, however, Sir Richard Temple, on the petition of the chief inhabitants of the district, consented to restore the College to its former status, provided that a considerable share of the increased cost was subscribed for by the community. A sum, amounting to more than Rs. 40,000, was subscribed during the year, and with this endowment the College was re-established on its original footing. Classes for the A Course for the B A. were opened in June 1888.

A prize of Rs. 80, founded by Babu Mohinimohan Ray, in 1883, and called the Mohinimohan Ray prize, is awarded annually to the student who most successfully passes the B. A. Examination with Honours, or to a graduate of the College who passes the M. A. Examination in any subject.

It was opened as a College in 1853. The foundation stone of the building, one moiety of the cost of which was paid by the community, was laid in 1863, and it was occupied in 1869

In 1865 the Institution was raised to the status of a College, giving instruction up to the standard of the B A. examination of the Calcutta University A Law Department was added in 1864. The status was, however, reduced in 1872 to that of a second grade College, and the Law Department was abolished in 1875.

The Institution again became a first grade College with a Law Department attached, in 1888 an M. A. class was opened at the commencement of the year 1889-90. The interest of this sum is used in giving five scholarships of Rs. 5 a month each, to the five students who gain the highest marks among the candidates, who compete for the Entrance Examination from the Berhampur centre. Each student retains his scholarship for two years, on the condition that he continues for that time in the Berhampur College, after passing the Entrance examination. Full information about these scholarships will be obtained by referring to the *Calcutta Gazette*, dated 10th December, 1884, Supplement, page 2457.

In pursuance of the policy recommended by the Education Commission and adopted by the Government of India, the Bengal Government decided in 1886 to transfer the Berhampur College to private management. The munificent offer of Her Highness the Maharani Swarnamayi, C I., of Cossimbazar, to maintain the College for five years was accepted,

Accordingly, by a Bengal Government Resolution, dated the 14th May, 1887, the control of the College, administrative and financial, was vested in a Board of Trustees, nominated by the Maharani. The Board consist of the District Magistrate and the District Judge for the time being, Babu Baikantnath Sen, B.L., Babu Srinath Pal, B.L., Babu Syamadas Ray, Babu Radhikacharan Sen, Zemindar, and Babu Gopalchandra Mukerjee, M.A., B.L., Pleader, Judge's Court, Murshedabad. Doveton College.

AFFILIATED, 1857.

This College is attached to the Parental Academic Institution, a day and boarding-school which was established on the 1st March, 1823, by a body of Christian parents who were anxious to secure for their children the benefits of a liberal education, its affairs being conducted by a Committee of Management elected chiefly from among the parents.

In 1855 a legacy of rupees two lakhs and thirty thousand was bequeathed to the Institution by the late Captain John Doveton, which enabled the Committee of Management to extend its sphere of usefulness by the addition, in 1856 of an Infant School or Initiatory Department, and the establishment of a College Department, named in honour of the donor. A few years later a Girls' Department was added.

In 1871 other bequests were made to the Institution by the late Mr. Lawrence Augustus de Souza, of the Firm of Messrs. Thomas de Souza and Sons of Calcutta. These consist, first, of the interest on a sum of rupees Three Lakhs, made permanently applicable to the maintenance and education of a certain number of boys and girls of East Indian parents of a certain class, who are admitted as boarders on the "Lawrence de Souza foundation," at the age of 10, and kept at school till the age of 18; and, secondly, of the interest on a sum of Rs. 15,000 for the establishment of a Scholarship in English literature styled the "Lawrence de Souza Scholarship." It is of the value of Rs. 50 per mensem, and is tenable for one year at the Doveton College; but it is open to any East Indian boy from any School or College, the successful candidate of one year being at liberty to compete for and hold the Scholarship from year to year until he graduates.

In addition to the above, Mr. L. A. de Souza bequeathed a further sum of Rs. 30,000, the interest of which is to be applied towards the education in England of an East Indian youth of ability, with the view of enabling him to compete for the Covenanted Civil Service of India. This is open to any East Indian candidate, whether educated at the Doveton College or elsewhere.

AFFILIATED, 1857.

This school was founded in 1845, and was formerly located in Chowringhee, Calcutta. In 1863 the want of a good school in the hills was much felt, and Calcutta being well supplied with schools, the old premises were sold, and with the proceeds an estate was purchased in Darjeeling, and a new school bearing the same name as the school in Calcutta, was built.

In 1858, two scholarships, worth 20 rupees a month, were founded as a memorial of Bishop Wilson, who had been from the beginning a warm friend to the school. One is given every year, and held for two years.

In 1863 Mr. Patrick Arson, of Calcutta, bequeathed to the school Rs. 3,500—Government Securities 5 per cent.—to establish an "Arson Scholarship."

La Martinière of Calcutta, together with similar Institutions at Lucknow and Lyons, was founded by General Claude Martin, a native of the latter place, and a General in the service of the King of Oudh.

General Martin bequeathed a large sum of money to be devoted to the establishment of a school for the Christian inhabitants of Calcutta, under the direction of the Supreme Court The School was opened on the 1st March, 1836, and was, according to the provision in General Martin's will, named "La Martinière."

By decrees of the Supreme and High Courts, a body of Governors has been constituted, consisting of the Governor-General, the Lieutenant-Governor of Bengal, the Chief Justice of the High Court, the Bishop of Calcutta, the Commander in-Chief, the Members of Council, the two Senior Barrister Judges of the High Court, the Advocate-General for the time being, and the Chairman of the Justices of Calcutta. The *ex-officio* Governors elect annually four other Governors, who, with one of the *ex-officio* Governors, form a Board of Acting Governors, to whom the general control of the Institution is entrusted.

By the decree of the Supreme Court, there must be upon the Foundation not less than 75 boys and 40 girls. The Foundationers are entirely supported from the funds of the School.

The General Assembly's Institution, Calcutta.

AFFILIATED, 1864.

This Institution was established in 1830, by the General Assembly of the Church of Scotland. It is the oldest Institution of the kind in India: for it was here that the system now all but universally followed, was first tried—of imparting the highest form of knowledge including sound Christian instruction, through the medium of the English language. Before this experiment, Bengali or Sanskrit had been exclusively favoured in Bengal by the Government, by Oriental Scholars, and even by Missionaries themselves. The new system was introduced by Dr Duff, who began his Missionary labours by founding this Institution. Valuable help in the way of procuring pupils was given at the commencement by the famous Rajah Ram Mohan Roy. The success of the Institution soon surpassed all expectations. The Governor-General declared publicly that it had produced "unparalleled results." After having been carried on for some years in various hired premises, the Institution was removed in 1839 to the present building, which is most conveniently situated in Cornwallis Square.

The Institution was temporarily closed in 1844, in consequence of the secession of the Missionaries with the Free Church. But it was re-opened in 1846 by the Church of Scotland, under the superintendence of the late Rev. Dr. Ogilvie, by whom it was carried on uninterruptedly, and with great efficiency, till his death in 1871. Dr. Ogilvie was succeeded by Dr. Robert Jardine, who retired in 1876; after which Mr. James Wilson officiated as Principal for the next two years. The Principals since then have been the Rev. William Hastie, M.A., B.D., the Rev. William Smith, M.A., and the Rev. John Morrison, M.A., B.D.

The General Assembly's Institution is divided into two Departments,—the College Department and the School Department.

In the College Department, which has been affiliated in the Faculty of Arts to the University of Calcutta since 1864, the students pay a monthly fee of Rs. 5 each. The regular subjects of the University curriculum are taught, embracing the English language and literature, the Sanskrit language and literature, history, mathematics, pure and applied, chemistry, physics, mental philosophy, and the doctrines and evidences of the Christian religion.

In the School Department pupils pay fees from 8 annas to Rs. 3 a month. Careful attention is given to instruction in religious knowledge.

Scholarships and Prizes.

1. The Macfarlane Gold Medal is awarded every year to the student of the fourth-year class who shows the greatest proficiency in all the College examinations of the year.

2. The Ogilvie Memorial Scholarship, of at least Rs. 5 per mensem, is awarded every alternate year to the student of the second-year class who takes the highest position in all the College examinations, and succeeds in passing the F. A. Examination of the University. This Scholarship is tenable in the General Assembly's College for the two years after passing the First Examination in Arts.

3. The Macleod Memorial Scholarship is awarded to a Christian student, who, being an under-graduate of the Calcutta University, is preparing for the ministry of the Christian Church.

4. The Steel Gold Medal is given for Scripture knowledge

5. Several prizes and scholarships are awarded for general proficiency in the College examinations.

Bishop Cotton School, Simla.

(FOUNDED, 1859 ; AFFILIATED, 1866.)

This School, the Head Mastership of which is in the appointment of the Bishop of Calcutta, was founded by the Most Rev. G. E. L. Cotton, Bishop of Calcutta, under the name of the Simla Public School. The Founder promulgated statutes for the School in 1863; wherein he styled his foundation, the Bishop's School, Simla, but this designation was subsequently changed, in 1866, to that at present in use for the purpose of perpetuating the name and generosity of the Founder.

The Government of the School is vested in a body of eight Governors, who act in conjunction with the Head Master.

The Governors are four *ex-officio*, and four elected from permanent residents of Simla.

The Head Master must be a communicant, and, *ceteris paribus*, one in Holy Orders is to be preferred to a Layman ; the second and Assistant Masters and all subordinate officers are appointed by the Head Master, their number being fixed by the Governors.

There are eight exhibitions of the annual value of Rs. 120, which are awarded to boys whose parents cannot without difficulty pay the full charges for their education.

A limited number of other exhibitions has also occasionally been awarded either under the same conditions as above, or as prizes given by examination : twelve such are being held at the present time.

The Trustees have the right of accepting any exhibitions founded by private liberality, under any rules, or on any patronage of which they approve.

The course of instruction in the Primary and Middle Departments of the School is framed upon the Educational Code of the Punjab Government : the High School adopts for its standard the curriculum of this University. Latin and Urdu are taught throughout the School : French, Greek, Drawing, Music, and Carpentering are taught as optional subjects. All the scholars are required to attend daily prayers, and to receive regular instruction in Holy Scripture. There is also instruction at stated times in the Church Catechism and the Prayer Book. There are at present 149 boys on the boards.

Jaypur Maharaja's College.

AFFILIATED, 1873.

This College was founded in 1844 by the Jaypur Durbar to secure for the people of Jaypur the benefits of a liberal education. It was originally opened as a school, but the success of the Institution having shown that its sphere of usefulness might be extended, it was raised to the status of a College, and affiliated to the Calcutta University up to the F. A. Standard in 1873, the instructive staff being at the same time augmented and improved to meet its wants. The Institution is now affiliated to the new University of Allahabad, and comprises three Departments,—an English, an Anglo-Vernacular, and an Oriental Department The English Department consists of the College proper, giving instruction up to the B. A. Standard of the Allahabad University, and a Preparatory School containing 12 graduated classes, many of which are divided into sections. In the Anglo-Vernacular Department all subjects are taught in Hindi, and English is taken as a second language. In the Oriental Department, Arabic, Persian or Sanskrit is extensively taught, and the students are trained up for the Oriental Examinations of the Punjab University. The average number of students on the roll of the College is 1,700. Besides intellectual training and a proper enforcement of discipline, particular care is taken to ensure the physical and moral well-being of the students The Institution also affords to its students the advantages of such an education as may fit them for State employment or professional careers.

A Library and a Debating Club are attached to the College.

Connected with the College and under the control of the Principal is a Rajput School, attended only by the young chiefs of the State, who undergo a special course of instruction

The College is also the centre of a number of schools in the State, which are in a manner affiliated to it, and are under the control of the Principal These schools are divided into District Schools, Village Schools, and Girls' Schools, and amount in number to 161, with a daily attendance of about 8,000 pupils. A system of examination is in force for the whole of Jaypur, the chief State Schools sending candidates to the main Institution. The Examinations are intended to lead up to the Middle Class Examination, and are managed by the Principal of the Maharaja's College

The Educational Institutions described above are entirely supported by the State, no tuition or entrance fee being exacted from the students. Prizes and scholarships to the value of more than Rs. 15,000

are awarded every year to deserving pupils, according to the results of periodical examinations, and examinations in special subjects. Books, too, are given gratis to poor boys, many of whom also receive stipends for their maintenance.

All students of the College, on successfully passing any University or Public Examination, receive stipends or scholarships from the State, varying from Rs. 8 to Rs. 15 a month, and tenable for two years.

A medal is annually awarded by His Excellency Lord Northbrook, to the first boy of the College for general proficiency, in commemoration of his visit to Jaypur in 1876.

Burdwan Raj College.

AFFILIATED, 1882.

This Institution, since its first establishment in 1817, has been one of slow but steady growth. True to its mission of supplying the demands of the public of Burdwan for education, in the modern acceptation of the term, it has always kept pace with the real wants of the place. Started as an Anglo-Vernacular school, imparting rudimentary education which satisfied the intellectual craving of the Burdwan people of the early days of British rule in India, it passed through different stages of improvement, developed various phases of usefulness, and at last attained a recognized position as a second grade College in 1881.

The educational establishments of His Highness the Maharaja divide themselves at the present time under six heads :—First, the College Department, which is open to all students that are matriculated in the Calcutta University, teaching up to the F. A. standard.

Second, the School Department serving chiefly as a feeder or tributary to the above, preparing students for the Calcutta University Entrance Examination.

Third, the Bengali School, teaching up to the Vernacular Scholarship Examination standard.

Fourth, the Persian Department, teaching, amongst others, those boys of the first two Departments that take up Persian as their second language.

Fifth, the Sanskrit School, imparting instruction in the orthodox native style to those whose religious scruples prevent them from availing themselves of the advantages of the English school.

And sixth and last, the Girls' School, the present provision in connection with which, though meagre, is more than sufficient to meet the requirements of female education as it is understood in Burdwan. All these Departments, with the exception of the last two, are under the control of the Principal.

The disbursements in the different Departments aggregate annually about Rs. 21,000, they being entirely met by the munificent charity of His Highness the Maharaja.

Education in all its varieties and phases is imparted gratuitously, several boys in consideration of their extreme indigence being found in money, besides being provided with free tuition.

Three scholarships of Rs. 10 per month each, and tenable for two years, are annually awarded to the best amongst those successful F. A. candidates from the College who fail to secure Government Senior scholarships, to enable them to study for the B. A. Examination.

Uttarpara College.

AFFILIATED, 1887.

This College is the final outcome of the long-continued efforts of Babu Jaykissen Mukherji (lately deceased) in furtherance of the cause of English education in Bengal In 1846 he had a Government School opened at Uttarpara, on the basis of an endowment by him and his brother Babu Rajkissen Mukherji (also deceased), of Rs. 1,200 a year, and a Government assignment of equal value. The School prospered, and won its way to the front rank among the Schools in Bengal.

Babu Jaykissen's wish was that his School should ultimately expand into a College, and to this end so long ago as the year 1853 he asked Government to raise the School to a first class College, offering to contribute an equal sum with Government towards the maintenance of the College. In 1883 he submitted a proposal for the conversion of the School into a second grade College, offering to make an endowment for its support, so that it might cost the Government nothing. The recently initiated educational policy of Government stood, however, in the way of his proposal being accepted, and it was accordingly not accepted.

He finally went up to Government in April 1887, with a proposal for the establishment of an aided College in connection with the old Government School. Government accorded him permission to open such a College, but on the condition that he took the School off the hands of Government. He agreed to do so, provided Government left the School the material advantages it derived from its connection with Government. It took some time to settle the terms of the transfer, which was formally effected in March 1889. The College and the Collegiate School are now under the management of a Board consisting of the Magistrate of Hughli as President, of Raja Pyarimohan Mukherji, C.S.I., and Babu Rasbihari Mukherji as representatives of the late Babu Jaykissen Mukherji, and of Babu Manohar Mukherji as representative of the late Babu Rajkissen Mukherji.

Two Scholarships of the value of Rs. 10 each, called "Jaykissen Scholarships," and tenable for two years at an affiliated College, are to be given every year by a gentleman who wishes that his name be not published, at least at present, to successful candidates from the Uttarpara College who, after having prosecuted a regular course of study in the College for full two sessions, pass in the 1st or 2nd Division at the First Arts Examination without winning Government Senior Scholarships. The award is to be made to those two students who stand highest among those who may satisfy the above requirements. Should one or both the Scholarships remain unawarded any year, they are to be awarded the next or any succeeding year in addition to the two annual scholarships. Armenian College.

AFFILIATED, 1888

This College is attached to the Armenian Philanthropic Academy a day and boarding School, which was established on the 2nd of April 1821, by influential members of the Armenian community

resident in Calcutta, "for the education of our youth, both rich and poor." In 1813 Chatoor Mooratkhan bequeathed a sum of Rs. 8,000 towards the opening of such an institution, and his liberality was so supported by a large number of donations, that when the Academy was set on foot it owned over Rs. 2,00,000.

Until the year 1883, the affairs of the School were administered by a number of Armenian gentlemen, who were styled Members of the Institution, and who elected four of themselves to be Managers. But in that year, under a decree of the High Court of Judicature at Fort William in Bengal, a scheme was drawn up for the future regulation and management of the Academy. The Funds of the School were placed in the hands of the Official Trustee of Bengal, and a Board of Managers was appointed.

The College keeps on its rolls about thirty foundationers of Armenian parentage. Some of these lads are provided for by the Armenian Association of Batavia; others, by the Armenian Church of Calcutta, and others, by the College itself. Besides these, pupils of all denominations are received as boarders and day scholars on payment of the usual fees.

Brajamohan Institution, Barisal.

AFFILIATED, 1889.

This Institution was founded as a higher class English School on the 27th of June, 1884, by the late Babu Brajamohan Datta, Small Cause Court Judge of Nuddea, at the request of the District Education Committee, who had been instructed by the Director of Public Instruction to secure the establishment of a private school, as the number of students in the Barisal Zila School had at that time exceeded 600, and the building was found too small for the accommodation of so many boys. Babu Brajamohan expressed his wish to raise the Institution to the status of a second grade college, but could not fulfil his desire because of his sudden death. His sons, encouraged by the unexpected success of the Institution, and with a view to carry out the wishes of their deceased father, have added the college classes, which have been affiliated up to the F. A. standard of the Calcutta University since June 1889

The object of the Institution is to give to the students intellectual, physical, as well as moral training, without any reference to any particular sect or creed. Particular attention is paid to the proper enforcement of discipline.

Monthly statements showing the attendance, progress, and conduct of the pupils of the School Department are sent to their parents for their remarks and suggestions. Meetings of teachers and guardians are held at intervals for the purpose of consulting each other on matters of internal economy.

The tuition fee in the College Department is Rs 3 a month.

Babu Birajmohan Raychaudhuri, Zemindar, has founded, in memory of his father, a prize of Rs 75, called the "Nabinchandra Prize," to be awarded in the shape of a gold medal, or books, according to the option of the recipient, to the best amongst the students who pass the Entrance Examination in the 1st Division from this Institution, provided he continues his studies in the College Department.

Thomason Civil Engineering College, Roorkee, P. W. D.

AFFILIATED, 1864.

The Thomason College was founded in 1847 by the Hon'ble James Thomason, Lieutenant-Governor, N. W. P. It is designed to supply the Public Works and Survey Departments with Assistant Engineers, Overseers, and Sub-Overseers, and to furnish professional works either on loan or purchase through its Library, Press, and Book Depôt.

The College contains three principal classes, *viz.*, an "Engineer Class," an "Upper Subordinate Class," and "Lower Subordinate Class," open to the candidates of all ranks and classes—intended to recruit the Engineer, Upper Subordinate, and Lower Subordinate Departments of the Public Works Department. It also conducts examinations of outsiders for several grades of the P. W. D.

Engineer Class.

The class is open to all statutory natives of India.

The Course lasts two years, when the passed students receive certificates as Assistant Engineers of the P. W. D. A certain number, 4 and 5 in alternate years, receive permanent appointments to the P. W. D. in the Engineer Grade commencing as Apprentice Assistant Engineers. A year's training as Apprentice is also given to two more, and there are also two permanent appointments to the Upper Subordinare Grade open. Candidates for this class must be between the ages of 18 and 22, and must all pass a *competitive* Entrance examination in language, literature, history, mathematics, elementary drawing and physical science.

All European students pay a college fee of Rs. 10 monthly. Three scholarships of Rs. 50 per mensem, tenable for two years, are annually open to native students. Several valuable prizes are given annually; one of Rs. 1,000 to the best student; one of Rs. 250 and one of Rs. 100 for the two best native students; besides two prizes of Rs. 100 and five of Rs. 50, open to all.

Upper Subordinate Class.

The College Course lasts two years, when the passed students receive certificates as Sub-Engineers or Overseers of the P. W. D. and 15 standing first on the list, preference being given to eight soldiers, are then sent for a year's probation on to the Public Works as "Apprentice Overseers," after which, if approved, they are appointed 1st, 2nd, or 3rd grade Overseers in the P. W. D.

All candidates for admission must pass a *competitive* Entrance examination in English, reading and writing, arithmetic, elementary geometry, mensuration, and drawing, and in Urdu and Hindi; and civilian candidates must be between the ages of 18 and 24.

Soldier students receive a "college allowance" of Rs. 11 monthly. Three scholarships of Rs. 30 each, and three of Rs. 25 each per mensem, are annually allotted to English civil students, and three of Rs. 10 each to native students, all tenable for two years.

Students of 3rd grade, if not stipend-holders, pay a college fee of Rs. 1-8 monthly. College prizes in each of the principal subjects of the course are annually given.

During the "apprentice year," a "staff allowance" is given to soldier students, raising their pay to a total of Rs. 80, together with free quarters and the usual "family allowance." Second and third grade apprentices receive salaries of Rs. 60 and 40 respectively; free quarters are also given to those of the second grade.

Lower Subordinate Class.

This class is intended for natives of India only. Most of the students remain for one and a half years only at College, and if successful, receive certificates as Sub-Overseers, and are appointed to the P. W. D., as vacancies occur; there is no guarantee of appointment.

The Entrance examination is competitive, and in the Urdu language. It comprises for class A, elementary history and geography and the use of English figures and words. For class B, a recommendation by an Executive Engineer that the candidate is a good artizan is required, and candidates are examined in arithmetic and writing. Candidates must not be more than 22, nor less than 18, years of age.

Free quarters are provided, no fees are required and the great majority of the students draw stipends of Rs. 5 a month and some of those standing highest on list Rs. 10. All students of B Classes draw stipends of Rs. 10 a month.

Course of Study in Principal Classes.

These vary very much, but include mathematics, civil engineering, surveying, drawing and Urdu for all the above principal classes,—the extent read being of course very different in each class—besides experimental science for the Engineer class and photography for both Engineer and Upper Subordinate classes.

Military Surveying Classes.

A class of 8 soldiers from British Regiments and another of 26 soldiers from Native Regiments are annually passed through a course in Military Engineering and Surveying.

Fees.

[With the exception of the small college fees above noted, the instruction in college is entirely gratuitous].

Outside Examinations.

The College also holds examinations, and grant certificates (of Qualification only) for the grades of Sub-Engineer, 1st Grade Overseer, Assistant Examiner of Accounts, and 4th Grade Accountant of the P. W. D, for all candidates who present themselves under certain rules.

অনেক বৎসর অতীত হইল ইংলণ্ডদেশে এক কৃষক বাস করিত। কৃষক এত পরিশ্রম করিত যে তাহার ক্ষেত্রে ঐ প্রদেশের অপর সকলের ক্ষেত্র অপেক্ষা অধিক ফসল জন্মিত। প্রতিবাসিরা মনে

করিত যে সে মায়া-বিদ্যার প্রভাবে এত ভাল ফসল উৎপন্ন করে। অবশেষে তাহারা তাহাকে ঐন্দ্রজালিক বলিয়া মেজেষ্ট্রেটের নিকট তাহার নামে অভিযোগ করিল। কৃষকের জবাব তলব হইলে সে তাহার এক বলিষ্ঠ, নীরোগ বালককে ও তাহার লাঙ্গলবাহক গৃহপালিত পশুগুলিকে বিচার-পতির সম্মুখে উপস্থিত করিয়া বলিল, "আমার ক্ষেত্রে যে কণ্টকাদি জন্মে তাহা এই বালক উঠাইয়া ফেলে; আমি ক্ষেত্রে ভাল করিয়া সার দিয়া থাকি; দেখুন আমার লাঙ্গলের অবস্থা খুব ভাল, আর এই পশুগুলিকে আমি এত যত্ন করিয়া খাওয়াই যে এ প্রদেশে আর এরূপ বলিষ্ঠ পশু আপনি দেখিতে পাইবেন না। এখন দেখুন কৃষিকার্য্যে আমি কি মায়াবলের সাহায্য পাইয়া থাকি! আমার প্রতিবাসীদিগের মধ্যে কেহ আমার ন্যায় এই সকল উপায় অবলম্বন করিলে তিনিও আমার ন্যায় উত্তম ফসল পাইবেন।"

মেজেষ্ট্রেট সাহেব বলিলেন যে তিনি পূর্ব্বে কখন কোন আসামীর এরূপ ভাল জবাব শুনেন নাই। পরে তিনি কৃষকের পরিশ্রমের বিষয়ে বহু প্রশংসা করিয়া তাহাকে বিদায় দিয়াছিলেন।

রাম ও শ্যাম।

রাম—নমস্কার। শ্যাম, কেমন আছ?

শ্যাম—নমস্কার। আছি ভাল; কত কালের পর দেখা হ'ল।

রাম—অনেক কালই বটে। বলি, এখন তো বি, এ, উপাধি পেয়েছ; কি কর্‌বে ঠিক করেছ? দাদা কাল আমাকে বল্‌ছিলেন যে তোমার কাউন্‌সিলি হবার ইচ্ছা আছে। সত্য না কি?

শ্যাম—হাঁ, তাই বটে। একটা কাজ তো খুঁজে নিতেই হ'বে; কিন্তু মনে করে দেখ, এখন সকল ব্যবসাই পূরে গেছে, নূতন লোকের স্থান পাওয়া ভার।

রাম—বারিষ্টারি, ডাক্তারি প্রভৃতি বড় বড় সকল ব্যবসাই পূরে গেছে বটে; কিন্তু আর কিছু দেখ্‌লে হয় না? চাবাগান করার কথা কি বল?

শ্যাম—তা হ'লে তো আমি আর কিছুই চাই না। কিন্তু যদি সমস্ত ভারতবর্ষ খুঁজে দেখ, তাহ'লে একটী এমন প্রদেশ পাবে না যেখানে বেশী পুঁজী না থাক্‌লে চাবাগান খোলা যেতে পারে। আমার তো নিজের কয়েক শতমাত্র টাকা আছে।

রাম—হাঁ তা বটে, কয়েক শত টাকাতে চাবাগান খোলা যায় না। এখন ভাই, দেরি হচ্চে, সন্ধ্যার পর তোমাদের বাড়িতে গিয়ে দেখা কর্‌বো আর এ বিষয়ে কথা কইবো। এখন আসি।

बहुत बरस पहिले इंगलिस्तान में एक किसान रहता था ; वह ऐसी कड़ी मेहनत से काम करता था, कि, उसकी ज़मीन सारे ज़िले में सब से बढ़के उपजाऊ थी। उसके पड़ोसियोंने सोचा कि, यह हमारी ज़मीनों स बढ़के ऐसी अच्छी फ़सल अपनी ज़मीन में पैदा करने क लिये ज़रूर कुछ जादु काम में लाता है। इस लिये वे उसे मजिस्ट्रेटके सामने लाए, और उन्होंने उस पर जादुगिर होनेका दोष लगाया। किसानसे उसका जवाब पूछे जाने पर उसने अपने मज़बूत और तनदुरुस्त लड़केको, और अपना हल, और उन चौपायोंको, जो हल चलाते थे, सामने लाके हाज़िर किया। और उसने कहा कि, यह लड़का उन घास पातोंको साफ़ करता है, जो मेरी ज़मीनपर जमते हैं। मैं उसमें हुशयारी के साथ खात देता हूं। आप देखिए, मेरा हल बहुत ठीक बना हुआ है, और मेरे चौपाये, जिनको मैं अच्छी तरह खिलानेके लिये ख़र्च करता हूं, इस देश में सब चौपायोंसे मज़बूत हैं। देखिए, यही सब जादु हैं, जिनको मैं मेरे खेत के इन्तिज़ामके लिये काम में लाता हूं। मेरे पड़ोसियों में से हर आदमी, जो वह इन्ही सामानोंको काम में लाए, वैसी अच्छी फ़सल पा सक्ता है, जैसी मैं पाता हूं।

मजिस्ट्रेटने कहा "मैंने इससे बढ़के अच्छा जवाब कभी नहीं सुना"। और उसने उस किसानकी मेहनतकी बड़ी तारीफ़ करके उसको छोड़ दिया।

राम और श्याम।

राम—श्याम, नमस्कार। आप कैसे हैं ?

श्याम—आपको धन्यवाद देता हूं, मैं बहुत अच्छा हूं। हम को पिछली बार मिले बहुत दिन हुए।

राम—ठीक है, बहुत दिन हुए। अब आप क्या करना चाहते हैं, आप अपनी डिग्री (degree) तो लेचुके? मेरे बड़े भाईने कल मुझसे कहा कि, आप वकालत करनेका इरादा रखते थे; क्या यह सच है?

श्याम—हां जी, मैं समझता हूं कि, मुझे ज़रूर कुछ काम ढूंढना पड़ेगा। पर समझिए, इन दिनों पेशेके सब कामोंमें इतने लोग हो गए हैं, कि, नए आदमियोंके लिये कोई जगह नहीं दिखाती।

राम—सच है, बारिस्टरी, डाक्टरी वग़ैरह, पढ़े लिखे लोगों के सब पेशोंका हाल यही है। पर और किसी बातके लिये क्यों नहीं जतन करते, जैसे कि, बाग़की खेती।

श्याम—ऐसी और कोई बात नहीं है, जिसे मैं इस बढ़के पसन्द करूं। पर जो आप सारे हिन्दुस्तानको ढूंढ़ें तो, आप एक भी ज़िला न पाईएगा, जहां बिन ज़ियादे पूंजीके बाग़का काम किया जा सक्ता है, और मेरे फ़क़त कई सौ रुपये हैं।

राम—हां, कई सौ रुपयोंसे नया बाग़ खोलनेका काम नहीं चलेगा। अब देर होती है, मैं आपके घर शामको मिलूंगा और इस बारेमें बातचीत करूंगा। अब नमस्कार करता हूं।

पुष्कळ वर्षां पूर्वीं इंग्लंदांत एक शेतकरी रहात असे. तो इतका मेहनती होता कीं त्याच्या जमिनींत त्या प्रांतांतील सर्व जमीनींपेक्षां चांगलें पीक येत असे. त्याच्या शेजाऱ्या पाजाऱ्यांना वाटे कीं ज्या अर्थीं आमच्या जमिनीं पेक्षां हा आपल्या जमिनींत इतकीं उत्तम पिकें उत्पन्न करतो त्या अर्थीं हा कांहीं तरी जादूटोण्याचे प्रयोग करीत असला पाहिजे. या कारणा वरून त्यांनीं त्याला फौजदारा पुढें नेलें आणि त्या वर हा जादूगार आहे असा आरोप ठेवला. शेतकऱ्याला जेव्हां या आरोपाचा जबाब देण्या विषयीं आज्ञा झाली तेव्हां तो आपला निरोगी आणि सशक्त मुलगा, स्वतःचा नांगर, व तो ओढणारीं गुरें पुढें घेऊन आला ; आणि म्हणाला कीं हा मुलगा माझ्या जमिनींतील सर्व तण उपटून काढतो ; मी तिच्यांत काळजी काढ्यानें खत घालतों ; माझा नांगर उत्तम अवस्थेंत आहे ; आणि आपल्या गुरांना चांगलें खाऊं पिऊं घालण्याची मी तसदी घेतों या मुळें तीं या प्रांतांतील सर्व गुरां पेक्षां जास्त सशक्त आहेत हें तुम्हांला दिसतच आहे. मी स्वतःच्या शेताची मशागत करण्याच्या कामीं कोणत्या जादू

टोण्याचा प्रयोग करतों हें पाहून घ्या. माझ्या शेजाऱ्यां पैकीं कोणी ही याच उपायांची योजना करील तर त्याच्या ही जमिनींत माझ्या जमिनींतल्या सारखीं च चांगलीं पिकें येतील.

फौजदारानें म्हटलें कीं असा सयुक्तिक जबाब या पूर्वीं मीं कधींच ऐकिला नाहीं; आणि त्यानें त्या शेतकऱ्याच्या उद्योगाची तारीफ करून त्यास सोडून दिलें.

रामराव आणि श्यामराव।

राम०—नमस्कार श्यामराव. तुमचें कसें काय चाललें आहे?

श्याम०—आपल्या कृपेनें उत्तम चाललें आहे. आपली भेट होऊन फार दिवस झाले, नाहीं बरें?

राम०—खरोखर च फार दिवस झाले. तुम्ही पदवीधर तर झालां आतां तुमचा स्वतःला काय बनविण्याचा विचार आहे? आमचे वडील बंधु काल म्हणत होते कीं तुमच्या मनांत वकील होण्याचा थोडा बहुत विचार आला आहे; हें खरें कां?

श्याम०—मला तर वाटतें कीं कांहीं तरी उद्योग पहावा. परंतु पहा तर खरें प्रत्येक धंद्यांत काम करणारांचीं आजकाल कशी रेलचेल होऊन गेली आहे ती, या मुळें नवीन मनुष्य संपादण्याला कोठें जागाच दिसत नाहीं.

राम०—डाक्टराचें काम, वारिस्टराचें काम इत्यादि जे विद्वत्तेचे धंदे आहेत त्या सर्वांची अशी गोष्ट आहे खरीच. परंतु या शिवाय आणखी कां नाहीं कांहीं करून पहात? उदाहरणार्थ चहाची लागवड.

श्याम०—याहून पसंत तर कांहीं च नाहीं. परंतु एथून तेथून सर्व हिंदुस्थानभर जरी धुंडून पाहिलें तरी पुष्कळसें भांडवल खर्ची घातल्या वांचून चहाचा मळा लावतां येईल असा एक ही प्रांत सांपडणें कठिण आहे, आणि मज जवळ स्वतःचे असे थोडेशें च रुपये आहेत.

राम०—खरेंच, थोडेशें रुपये असल्यानें नवीन मळा लावण्याच्या कामीं फारशी मदत होण्या सारखी नाहीं. पण आतां वेळ होत चालली, तर आज संध्याकाळीं मी तुमच्या घरीं येऊन तुमच्याशीं या विषया वर बोलेन. जातों तर आतां. नमस्कार.

The farther we advance to the south-east in Russia the more desolate does the aspect of the surface become First the rainfall fails, so that crops cannot be depended on. Then the black earth itself disappears, and after that the farmers find it very hard work to wring a living from the soil A much more pleasing scene is presented by the strip of land in the south-east corner of the Crimea. Sheltered by the hills from the cold north winds, a vegetation flourishes here such as is not met with elsewhere in Russia. Trees and shrubs, flowers and fruits, all remind us of the shores of the Mediterranean; and the climate of this out-of-the-way corner of the country is much like that of Italy and the south of France.

(*a*) There is a story in the Arabian Nights Tales of a king who had been long suffering from a certain illness, and had taken abundance of medicines to no purpose. At length, says the fable, a physician cured him by the following method : he took a hollow ball of wood, and filled it with several drugs ; after which he closed it up in such a way that what was within could not be seen. He then ordered the king, who was his patient, to exercise himself early in the morning with that ball, till such time as he should sweat. The exercise consisted in tossing up the ball again and again. The story says that as the king perspired, the virtue of the medicines which issued through the wood, had so good an effect on the king's constitution, that he was cured of an indisposition which all the medicines he had taken inwardly had not been able to remove.

(*b*) Cornaro was in his childhood of an infirm constitution, and remained so till he was forty, when by obstinately persisting in a course of temperate diet, he recovered a perfect state of health. At fourscore he published a book which has been translated into many languages.

(*c*) Arjuna, nothing daunted, drew his bow with all his might ; he shot the arrow through the centre of the whirling chakra into the eye of the golden fish. A roar of acclamations rose like the crash of thunder. The Brahmans waved their scarfs with delight.

Before the destruction of Carthage the people and Senate jointly governed the state with equal moderation and harmony. The citizens had no contests with each other on account of power and influence. Fear of the enemies kept the state in good order; but when this fear was removed, pride and corruption ruled unchecked in the state. Thus the peace which the citizens had so ardently wished for in the time of war and danger, proved more fatal to them than either. The nobility were bent upon converting their dignity into tyranny, and the people their liberty into licentiousness Abandoning all care for the public good, they all laboured only to obtain as much power and property as they possibly could.

A more attractive mood is represented in Asad's account of how Akbar smoked his pipe of tobacco. 'In Bijapur I had found some tobacco. Never having seen the like in India, I brought some with me and prepared a handsome pipe of jewel work. The stem, the finest to be procured at Achin, was three cubits long, beautifully dried and coloured, both ends being adorned with jewels and enamel I happened to come across a very handsome mouth-piece of Yaman cornelian, oval-shaped, which I set to the stem; the whole was very handsome. There was also a golden burner for lighting it, as a proper accompaniment. 'A'dil Khan had given me a betel bag of very superior workmanship; this I filled with fine tobacco, such that if one leaf be lit, the whole will continue burning. I arranged all elegantly on a silver tray. I had a sliver tube made to keep the steam in, and that too was covered with purple velvet.'

In order to rise early, I would earnestly recommend an early hour for retiring. There are many other reasons for this. Neither your health nor your eyes are then likely to be destroyed. Nature seems to have so fitted things, that we ought to rest in the early part of the night. Dr. Dwight used to tell his students 'that one hour of sleep before midnight is worth more

than two hours after that time.' Let it be a rule with you, and scrupulously adhere to it, that your light shall be extinguished by ten o'clock in the evening. You may then rise at five and have seven hours to rest, which is about what nature requires.

At this time the sound of music proclaimed the hour of repast, and the conversation was concluded. The old man went away sufficiently discontented to find that his reasonings had produced the only conclusion which they were intended to prevent. But in the decline of life, shame and grief are of short duration whether it be that we bear easily what we have borne long ; or that, finding ourselves in age less regarded, we less regard others ; or that we look with slight regard upon afflictions, to which we know that the hand of death is about to put an end. The prince, whose views were extended to a wider space, could not speedily quiet his emotions. He had been before terrified at the length of life which Nature promised him, because he considered that in a long time much must be endured ; he now rejoiced in his youth, because in many years much might be done.

The edifice, set upon a terrace that overlooks the surrounding gardens, is built of blocks of pure marble and rises to a height of 243 feet. Descending from one's carriage in front of a noble portico of red sandstone, pierced by a single grand horse-shoe arch, which is covered with white arabesques, and passing under the vault of the same, one beholds the Taj uplooming at a distance of some eight hundred meters. Probably no masterpiece of architecture produces an effect like that here experienced. Afar in the back-ground of a marvellous garden, reflected in all its whiteness in a canal's gloomy waters that sleep motionless amid a dense mass of cypresses and great clusters of red flowers, the perfect monument rises like a calm vision. It seems a floating dream, an ærial creation devoid of weight, so perfect is the equilibrium of its lines, so pale, so light the shadow that hovers above its translucent virgin marble.

On Thracia's hills the Lord of War

Has curbed the fury of his car,
And drop'd his thirsty lance at thy command.

1. Trace the development of the Essays through the different editions published in Bacon's lifetime. Explain and illustrate the difference between the style of the earlier and of the later essays. 5

2. Explain the following passages, showing the connection with the context:— 24

(*a*) To him that opens himself men will hardly show themselves adverse, but will (fair) let him go on, and turn their freedom of speech to freedom of thought. And therefore it is a good shrewd proverb of the Spaniards, *tell a lie and find a troth.*

(*b*) The schoolmen were like astronomers, which did feign eccentrics and epicycles, and such engines of orbs, to save the phenomena, though they knew there were no such things.

(*c*) The danger is not from that state, but where it hath a dependence of foreign authority, or where the churchmen come in and are elected, not by the collation of the King, or particular patrons, but by the people.

(*d*) It is the care of some only to come oft speedily for the time, or to contrive some false periods of business, because they may seem men of despatch. But it is one thing to abbreviate by contracting, another by cutting off.

(*e*) The modern languages give unto such persons the name of favourites, or privadoes; as if it were a matter of grace or conversation. But the Roman name attaineth the true use and cause thereof, naming them *Participes curarum.*

(*f*) There be secret and hidden virtues that bring forth fortune, certain deliveries of a man's self, which have no name. The Spanish name disemboltura partly expresseth them, when there be not stonds nor restiveness in a man's nature, but that

the wheels of his mind keep way with the wheels of his fortune.

(*g*) I wish also, in the very middle, a fair mount, with three ascents and alleys, enough for four to walk abreast; which I would have to be perfect circles, without any bulwarks or embossments and the whole mount to be thirty foot high, and some fine banqueting house, with some chimneys really cast, and without too much glass.

(*h*) Mean men in their rising must adhere; but great men, that have strength in themselves, were better to maintain themselves indifferent and neutral. Yet even in beginners, to adhere so moderately, as he be a man of the one faction, which is most passable with the other, commonly giveth best way.

3. What influence had the study of Macchiavelli on Bacon's morality? What traces are there of it in the Essays? 6

4. What did Bacon mean by *Philosophia Prima?* Quote from the Essays three principles which might possibly belong to it. 6

5. In what way does Bacon quote and apply the Bible? Give instances 4

6. (*A*) Modernise the following:— 5

In sutes of favour the first comming ought to take but litle place, sofarfoorth consideration may be had of his trust, that if Intelligence of the matter could otherwise have beene had but by him, advauntage be not taken of the note: to be ignorant of the value of a suite, is simplicitie, as well as to be ignorant of the right thereof is want of conscience.

(*B*) Give the meaning in which Bacon uses the following: —antimasque, antecamera, broken music, gaudery, gallhard, habilitation, imposthumations, knee-timber, looses, newel, oes, point-device, queech, resorts, sbirrerie. 5

7 How does Thackeray deal with the English humourists, and by what test does he wish to judge them? Do you think the treatment adequate? 4

8. Characterise briefly the comedy of Congreve. Describe the conflict between him and Jeremy Collier. What apology has been offered for Congreve in modern times, and what do you think of it? 8

9. Explain:— 18

(*a*) Mr. Macaulay has quoted the charming lines of the poet where the king of the pigmies is measured by the same standard.

(*b*) A touch of Steele's tendernes is worth all his finery; a flash of Swift's lightning, a beam of Addison's pure sunshine, and his tawdry playhouse taper is invisible.

(*c*) Is the glory of Heaven to be sung only by gentlemen in black coats? Must the truth be only expounded in gown and surplice, and out of those two vestments can nobody preach it? Commend me to this dear preacher without orders —this parson in a tye-wig.

(*d*) We love him, as children love their love with an A, because he is amiable.

(*e*) Alas! for poor Dick Steele! For nobody else, of course.

(*f*) The world has discovered a difference between tweedle-

dee and tweedle-dum, and has given a hearty applause and admiration to Hogarth too, but not exactly as a painter of scriptural subjects, or as a rival of Correggio.

(*g*) He goes to work systematically and of cold blood; paints his face, puts on his ruff and motley clothes, and lays down his carpet and tumbles on it.

10. What views do Macaulay and Thackeray respectively hold with regard to history? Compare them. 6

11. Explain:— 3

(*a*) These poems differ from others as atar of roses differs from ordinary rose water, the close packed essence from the thin diluted mixture.

(*b*) Very few and very weary are those who are in at the death of the blatant beast.

12. Trace as far as you can in the poems of Elizabeth Barrett Browning the effects of her long seclusion from the world. 5

Point out the solecism in the following:—Considering that up to this time, how little she had done to startle the world, that how few even of her better poems were before it, it must be confessed that Horne's request for particulars of her life seems to have been rather premature. 1

1. Explain the following, adding a note on each of the words in italics:— 29

(*a*) We country *sluts* of merry Fressingfield
Come to buy needless naughts to make us fine,
And look that young men should be *frank* this day
And court us with such fairings as they can.
Phœbus is blithe, and *frolic* looks from heaven,
As when he courted lovely *Semele*,
Swearing the pedlers should have empty packs,
If that fair weather may make *chapmen* buy.

(*b*) Good Lord, Master *Plutus*, I have seen you a thousand times at my master's, and yet I had never the manners to make you drink. But, sir, I am glad to see how conformable you are to the statute.—I warrant you he's as *yeomanly* a man as you shall see mark you, masters, here's a plain honest man without *welt* or *guard*

(*c*) Through no disturbance of the soul,
Or strong *compunction* in me wrought,
I supplicate for thy control;
But in the quietness of thought:

Me this *unchartered* freedom tires;
I feel the weight of chance-desires;
My hopes no more must change their name,
I long for a repose that ever is the same.

(*d*) M. is said to bear his *mitre* high in India, where the *regni novitas* (I dare say) sufficiently justifies the bearing. A humility quite as primitive as that of *Jewel* or *Hooker* might not be exactly fitted to impress the minds of those Anglo-Asiatic *diocesans* with a reverence for home institutions and the church which those *fathers* watered.

(*e*) Conceive the sentiment boarded up, freighted, entered at the Custom House (startling the *tide-waiters* with the novelty), hoisted into a ship. Conceive it pawed about and handled between the rude jests of *tarpaulin* ruffians—a thing of its delicate texture—the salt bilge wetting it till it became as vapid as a damaged *lustring*. Suppose it in material danger (mariners have some superstition about sentiments) of being tossed over in a fresh gale to some *propitiatory* shark (spirit of *St. Gothard*, save us from a quietus so foreign to the deviser's purpose!), but it has happily evaded a fishy consummation.

(*f*) For even those hardhearted evil men who think virtue a school-name, and know no other good but *indulgere genio*, and therefore despise the austere admonitions of the philosopher and feel not the inward reason they *stand upon*, yet will be content to be delighted, which is all the good-fellow poet seemeth to promise, and so steel to see the form of goodness, which seen they cannot but love, ere themselves be aware, as if they took a medicine of cherries.

(*g*) Whereas other acts retain themselves within their subject and receive (as it were) their being from it, the poet only bringeth his own *stuff*, and doth not learn a *conceit* out of a matter, but maketh matter for a conceit.

2. What are the historical facts of Roger Bacon's life? Contrast them with the character in which he appears in the play, and mention any anachronisms which occur in it. 6

3. Explain the phrases:— 9

I'll prince it out; quainter dames than she; a farmer's son that never was so quaint; all amost; she'll swap thee into her plackerd; the force of his pentageron; Bacon roves a bow beyond his reach; to make a cope; proportioned as was Paris; Henry's wanton son; Henry's white son; sorteth to ill end; out of all ho; covey of coxcombs; neat claret wine; the battling pastures; if they could scape the teasers or the toil.

4. What does Greene mean by— 11

7. Explain the following :— 8

(d) The best of what we do and are,
Just God, forgive.

(e) We have given our hearts away, a sordid boon.

(f) Sacred Religion, mother of form and fear.

(g) High heaven rejects the lore
Of nicely calculated less or more.

(h) The light that never was, on sea or land.

8 'These four are all that any way deal in that consideration of men's manners' What four? How does Sidney prove that poetry is superior to the others? Illustrate by examples, both his and your own. 7

9 Who or what are alluded to in the following?— 11

Nizolian paper books; Hospital of France; Pacolet's horse; a crafty Davus; the cruel Severus . . . and the excellent Severus; the impertinent Goshen; put on the weeds of Dominic; to mate Hyperion; the hero of La Mancha; the Preux Chevalier of age; when Dorimant hands a fishwife across the kennel.

Also prove that there are two fixed points which may be considered as the *limiting* circles of the first system, which lie on every circle of the second system, and which are so related that the polar of each with respect to any circle of the first system passes through the other.

3. Being given the general equation of the conic, 10

Intellectum est quid interesset inter levitatem contionatorum et animum vere popularem, saluti populi consulentem. Video de istis, qui se populares haberi volunt, abesse non neminem, ne de capite videlicet civium Romanorum sententiam ferat. Is et nudiustertius in custodiam cives Romanos dedit et supplicationem mihi decrevit et indices hesterno die maximis prœmiis affecit. Jam hoc nemini dubium est, qui reo custodiam, quæsitori gratulationem, indici prœmium decrevit, quid de tota re et caussa judicarit. At vero C. Cæsar intelligit legem Semproniam esse de civibus Romanis constitutam; qui autem rei publicæ sit hostis, eum civem nullo modo esse posse; denique ipsum latorem legis Semproniæ jussu populi pœnas rei publicæ dependisse.

(*a*) Name the 'latorem legis Semproniæ' and examine how far Cicero's statement regarding him is borne out by historical facts.

The tribunitian authority had been restored under the consulship of Cn. Pompeius; and many young men who were elected to this office, presumptuous and inexperienced, stirred up the common people against the Senate by bribing them and making them promises which, they knew well, could never be realized. The nobility opposed the tribuni, but under the pretext of maintaining the authority of the Senate, they were only intent upon furthering their own interests. There was no moderation, no limit to the furious passions of either party.

Bathing in the daytime, while being purified by the rays of the sun, is the approved form of bathing. Bathing in the night is not approved unless when Ráhu is visible in the horizon.

Bathing, making gifts, the performance of austerities and burnt-offerings may take place at night when an eclipse is seen. Night, otherwise, is impure, therefore night is to be shunned in performing rites.

At the ceremony of marriage, when the sun passes from one zodiacal sign to another, and during an eclipse, gifts are allowable in the night time, but not allowable in any other case.

When a Brahman has performed the duty of offering to the Viśve Devas, if an unexpected guest arrives—be he a favourite, be he an object of hate, be he a dunce, be he a learned man—he is the very bridge for crossing over to the seats of bliss. He should be considered a true unexpected guest who has come over from afar, fatigued in body after the performance of the rite of Viśve Devas—one arrived beforehand is not an unexpected guest. Never should one belonging to the selfsame village be accepted as an unexpected guest. His name *Atithi* arises from the fact of his arriving unexpectedly.

Several of their idols, as Manat in particular, were no more than large rude stones, the worship of which the posterity of Ismail first introduced ; for as they multiplied, and the territory of Mecca grew too straight for them, great numbers were obliged to seek new abodes ; and on such migrations it was usual for them to take with them some of the stones of that reputed holy land, and set them up in the places where they settled ; and these stones they at first only went round out of devotion, as they were accustomed to do the Kabah. But this at last ended in rank idolatry, the Ismailites forgetting the religion left them by their father so far as to pay divine worship to any fine stone they met with.

After Lodi's return, his enviers and enemies and, in particular, Quṭlu Khan, ensnared the fickle Dáúd in a mesh of intrigue. Dáúd's whole life was a game of frivolity and sensual pleasure; his jealousy, his consciousness of sin, his fear that a man whom he had so deeply injured as Lodi, and who possessed such ample power, might cast him down and usurp his place—all these motives led him to give ready ear to malicious innuendoes. He followed the march of Lodi's army as far as the house of Jalal Khan of Chatmara, and there summoned Lodi and his *vakil* to a council. They, suspecting nothing, attended almost without escort; suddenly, on a signal from Dáúd, Qutlu Khan and his accomplices burst into the room, took them unawares, and after a brief struggle, in which Lodi's sword-bearer was hewn in pieces, overpowered and bound them.

But we look on the conduct of Hastings in a somewhat different light. He was struggling for fortune, honour, liberty, all that makes life valuable. He was beset by rancorous and unprincipled enemies. From his colleagues he could expect no justice. He cannot be blamed for wishing to crush his accusers. He was, indeed, bound to use only legitimate means for that end. But it was not strange that he should have thought any means legitimate which were pronounced legitimate by the sages of the law, by men whose peculiar duty it was to deal justly between adversaries, and whose education might be supposed to have peculiarly qualified them for the discharge of that duty. Nobody demands from a party the unbending equity of a judge. The reason that judges are appointed is, that even a good man cannot be trusted to decide a cause in which he is himself concerned. Not a day passes on which an honest prosecutor does not ask for what none but a dishonest tribunal would grant. It is too much to expect that any man, when his dearest interests are at stake, and his strongest passions excited, will, as against himself, be more just than the sworn dispensers of justice.

I have diligently considered the position of the earth and sun, and formed innumerable schemes, in which I changed their situation. I have sometimes turned the axis of the earth, and sometimes varied the ecliptic of the sun: but I have found it impossible to make it a disposition by which the world may

be advantaged: what one region gains, another loses by an imaginable alteration, even without considering the distant parts of the solar system with which we are unacquainted. Do not, therefore, in thy administration of the year, indulge thy pride by innovation; do not please thyself with thinking that thou canst make thyself renowned to all future ages, by disordering the seasons. The memory of mischief is no desirable fame. Much less will it become thee to let kindness or interest prevail. Never rob other countries of rain to pour it on thine own. For us the Nile is sufficient.

Among the artists that had been allured into the happy valley, to labour for the accommodation and pleasure of its inhabitants, was a man eminent for his knowledge of the mechanical powers, who had contrived many engines both of use and recreation. By a wheel, which the stream turned, he forced the water into a tower, whence it was distributed to all the apartments of the palace. He erected a pavilion in the garden, around which he kept the air always cool by artificial showers. One of the groves, appropriated to the ladies, was ventilated by fans, to which the rivulets that ran through it gave a constant motion; and instruments of soft music were placed at proper distances, of which some played by the impulse of the wind, and some by the power of the stream.

Poverty is, except where there is an actual want of food and raiment, a thing much more imaginary than real. *The shame of poverty*, the shame of being thought poor, is a great and fatal weakness, though arising from the fashion of the times themselves. When adulation is sure to follow wealth, and when contempt would be awarded to many if they were not wealthy, who are spoken of with deference, and even lauded to the skies, because their riches are great and notorious; when this is the case, we are not to be surprised that men are ashamed to be thought to be poor. This is one of the greatest of all the dangers at the outset of life; it has brought thousands and hundreds of thousands to ruin, even to *pecuniary* ruin.

It is indeed impossible to deny that in the great art of inspiring large masses of human beings with confidence and attachment, no ruler ever surpassed Hastings. If he had made himself popular with the English by giving up the Bengalees to extortion and oppression, or if, on the other hand, he had conciliated the Bengalees and alienated the English, there would have been no cause for wonder What is peculiar to him is that, being the chief of a small band of strangers, who exercised boundless power over a great indigenous population, he made himself beloved both by the subject many and by the dominant few. The affection felt for him by the civil service was singularly ardent and constant. Through all his disasters and perils, his brethren stood by him with steadfast loyalty. The army, at the same time, loved him as armies have seldom loved any but the greatest chiefs who have led them to victory. Even in his disputes with distinguished military men, he could always count on the support of the military profession. While such was his empire over the hearts of his countrymen, he enjoyed among the natives a popularity, such as other governors have perhaps better merited, but such as no governor has been able to attain.

When it was announced to him that the physicians had given

over all their efforts, declaring that medicine could no longer avail, Baber seized on the only hope that remained, and, in conformity with a superstition which still prevails in the East, he determined to devote his own life for that of his son. His friends, who had as little doubt of the efficacy of this substitution as he had himself, entreated him to forbear from a sacrifice involving the happiness of so many; but Baber's resolution was unmoved. He walked three times round the bed of the dying prince (a solemnity usual on such occasions), and then spent some moments in earnest prayer to God; at the end of which, he was filled with such assurance, that he more than once exclaimed, 'I have borne it away!' and so powerful was the impression both on his mind and his son's, that all the historians agree that Humayun began from that time to recover, while it is certain that Baber, who was already ill, and whose health must have been severely shaken by his anxiety and agitation, began visibly to decline.

Here the sons and daughters of Abyssinia lived only to know the soft vicissitudes of pleasure and repose, attended by all that were skilful to delight; and gratified with whatever the sense can enjoy. They wandered in gardens of fragrance, and slept in the fortress of security. Every art was practised to make them pleased with their own condition. The sages who instructed them told them of nothing but the miseries of public life, and described all beyond the mountains as regions of calamity, where discord was always raging, and where man preyed upon man. To heighten their opinion of their own felicity, they were daily entertained with songs, the subject of which was the *happy valley*. Their appetites were excited by frequent enumerations of different enjoyments, and revelry and merriment were the business of every hour, from the dawn of morning to the close of the evening.

Tagore Law Examination.

1892.

Examiner—MAULAVI MUHAMMAD YOUSUFF KHAN BAHADUR, B. L.

The figures in the margin indicate full marks.

1. What are the sources of Mahomedan Law? How are Words divided according to the Mahomedan system of jurisprudence? 25

The Koran lays down the expression "three Kooroo" as the period of Iddut for divorced women. What is the meaning of the word Kooroo according to Imam Abu Huneefa, and wherein does Imam Shafei differ from the former, and what is the process of reasoning by which each of the two Imams supports his view, and what is the practical result of the difference? What is the general rule underlying the reasoning of Abu Huneefa? Give other instances of such general rule. How is the general rule of Abu Huneefa applicable in the construction of the expression, Fai or "then," in the following quotation from the Koran, and what view does Abu Huneefa entertain regarding the husband's power of giving divorce after Khoola and how does Shafei meet that view?

Divorce is made twice, [*i. e.*, you may give two Rujue, or irrevocable divorces to your wife at once, or you may give two Sherai divorces in each period of purity]: then (Fai) it is obligatory on the husband to retain [the wife] with propriety or to leave [her] with excellence: and it is not lawful for you all, (*i. e.*, the husbands) that you should take back any part of what you might have given to them, [*i. e*, your wives] unless when they both, [*i. e*, the husband and wife] fear that they both shall not be able to fulfil the ordinance of God. Then [or Fai] if you all [Oh! Kazees or guardians of husband and wife] are afraid that they, [*i. e.*, husband and wife] shall not fulfil the ordinance of God, it is not sinful in them both, [*i e*, the husband and wife] that the women shall give redemption money. All this constitutes God's ordinance, and therefore you should not overstep the boundary thereof, and they who overstep such boundary are oppressors [of their own selves]. *Then if the husband divorces her,* [*i. e.*, his wife] *she shall not be lawful to him,* [*i e.*, the husband] after this, [*i e.*, after this last divorce] until she marries a husband different [from the first husband]. Then if he [the new husband] divorces her it is not sinful in them [that is the first husband and the wife] that they should

return to each other [that is make a fresh marriage] if they believe that they will fulfil the ordinance of God: And all this is the ordinance of God, which God lays down for a knowing tribe [that is for people who are *sui juris* and are not insane or minors and have understanding].

2 What is the import of an aam, or general expression according to Mahomedan Jurisprudence. What is the conflict in the following two Sooras of the Kooran, and how is that conflict removed and the texts reconciled according to Abu Huneefa, and what is the view of the conflict taken by Ally? 10

The passage from Soorai Nisai Toola runs thus:—

"And *those men* who die from amongst you (true believers) and leave their wives, the wives shall wait (and not marry) with their free will for four months and ten days."

The passage from Soorai Nisai Koosra runs thus:—

"And *those women* who are pregnant, their Iddut is delivery from pregnancy"

3. What is the primary or Hukeekut use of a term and what is the secondary or Majaz use, as understood in Mahomedan Jurisprudence? 20

What sort of connection is necessary for the Majaz or secondary use of an expression?

Is a marriage valid in which the expression "gift" was used? If so what are the reasons? What are the reasons assigned by Shafei for confining the validity of a marriage with the use of the word "gift" only to the case of the prophet, and how does Imam Abu Huneefa meet the view taken by Shafei?

Can there be a valid divorce by the use of the word "emancipation"? Can there be a valid emancipation by the word "divorce?" Give reasons.

4. If a man says as regards his slave, older in age than the speaker "this is my son," what is the effect of the expression according to Abu Huneefa's view and what according to the view taken by the two disciples? What is the rule in regard to the Majaz or secondary use of an expression of which the above instance is an illustration, both according to Abu Huneefa and the two disciples, and what are the reasons adduced for the views respectively taken. What argument is deduced in support of a particular view in this matter by the instances technically known as, Muss-i-Sama and Kooza, that is when a man swears "By God I will touch the sky" and "By God I will drink the water in the jug? 16

What is the rule in case a man says in regard to a woman who is older in age, or whose descent is well known from some other man, "This is my daughter?"

5. "What is the import of the word "and" according to Abu Huneefa and according to the two disciples? What is the effect of the expression "If you enter the house, you are divorced *and* divorced *and* divorced" and of the expression "You are divorced *and* divorced *and* divorced if you enter the house" and of the expression "you are divorced thrice, if you enter the house" and of the expression "if you enter the house, you are divorced thrice?" 14

What is the rule in regard to the construction of the word "and" when it is used to join two sentences? What is the meaning of the expression—"If thou enterest the house, then thou art divorced *and* thy co-wife is divorced," and of the expression—"If thou enterest the house, then thou art divorced, *and* thy co-wife."

6. What is the lowest period of gestation, in the establishment of parentage, and from what event is such period calculated in the case of Nikah Fasid and Nikah Suheeh, that is invalid marriage and valid marriage? What is the difference between a Fasid and Suheeh marriage? 10

7. What is Khoola and what is Zihar? 5

1. A town in Bengal, with a population of 40,000 persons, is to be supplied with water from a river, whose waters contain silt but are otherwise pure, distant 6 miles from the town. The lowest water level of the river is R. L 165·00. The level of the river bank and ground at the head works is R. L. 185·00. The level of the town is R. L. 200·00. State briefly what works and plant are required in order to convey a pure supply to the town. 40

In the last question the internal diameter of the pipes which convey the water to the town is 12″, and the coefficient of friction is $\zeta = 01\left(1+\frac{1}{12d}\right)$ where d is the diameter in inches. Supposing it were desired to construct a reservoir at the river bank at such an elevation that the water would descend from it to the town by gravitation, what must be the elevation of the reservoir-bed above the ground to give a supply at the rate of 5 gallons per head of population per day, half the supply to be delivered in four hours, and the remainder in eight hours? 70

What would be the effect on the supply if the bed of the reservoir were lowered to a height of 30 feet above ground level?

If the level of the ground half-way between the river and the town is R. L. 260·00, what should be the position of the pipes relatively to the ground at this point?

If the level of the pipes 1 mile from the town is R. L. 190·00, what is the bursting-pressure in the pipes at this point?

A distributary taking off from this canal has a bed-width of 5 feet, sides slopes of 1 to 1, a longitudinal bed slope of 15″ per mile, and is to be worked with a maximum depth of water of 3 feet. The bed of the distributary at the head is one foot above that of the canal. What area of waterway is required for the distributary head sluice? 70

The following values are to be used throughout this paper :—

Wrought Iron.—Coefficient of elasticity 13,000 tons per sq. inch.

Safe working stress—5 tons per sq. inch compression and tension.

Timber.—Safe working stress—1 ton per sq. inch compression and tension.

Brick-masonry.—Weight—112 lbs. per cub. ft.

---

1. Explain what is meant by—

Stress ; strain ; working stress : ultimate strength ; factor of safety ; elasticity ; elastic limit ; permanent set ; live load ; bending moment ; shearing force ; moment of inertia ; torsion ; line of resistance ; linear arch ; funicular polygon ; frame diagram ; force diagram ; reciprocal figure. 30

2. Show that the resistance of an elastic prismatic piece to shocks depends, not on any one of its linear dimensions, but upon its volume only. 20

3. A narrow platform 6 feet long is suspended from a rigid beam by two wrought iron rods, each 1″ in diameter and 15 ft. long, one at each end of the platform and situated in its centre line. A weight of 1 cwt. is dropped from a height of 10 ft. above the platform so as to fall on its centre line at a point distant 2′ from one rod and 4′ from the other. Find (*a*) the maximum intensity of stress and (*b*) the elongation momentarily produced in each rod. 20

What would be the maximum intensity of stress and elongation (I) if the weight were applied suddenly to the platform, but without falling through any height, and (II) if it were applied gradually. The platform is assumed to be perfectly rigid, strong, and weightless The weight of the rods themselves, and all effects of vibration are to be neglected.

4. The sketch represents a wooden floor, intended to carry a maximum live load of 100 lbs. per sq. foot, (including the weight of the floor itself) and supported on hollow cylindrical cast iron columns with flat ends Taking the thickness of metal as $\frac{1}{2}$″ what should be the diameter of the columns ? The constants in Gordon's formula are 30

$$f = 80{,}000 \text{ lbs. per sq. in.}$$
$$a = \frac{1}{800}$$

Calculate the requisite dimensions for the joists.

5. What should be the dimensions of the architraves in bay No. 1 in the last question ? What would be the deflection of the joists under the action of the maximum load ? 30

6. A cylindrical chimney of brick-masonry is 1′ 9″ in internal diameter at the top. At a horizontal section 20′ from the top the external diameter is 4′ 3″, the thickness of the masonry 30

all the way down being 10″. What is the limiting horizontal wind pressure to which the chimney may safely be exposed, so far only as the horizontal section 20′ from the top is concerned? The conditions of stability at this section under the limiting wind-pressure should be thoroughly examined. The pressure of the wind on a cylindrical surface may be taken as half that on a flat surface of the same projected area normal to the direction of the wind.

7. The sketch represents a roof-truss to be erected in a verandah in an exposed situation liable to be visited by cyclones. The material to be used is timber. Assuming the wind to act in a direction making an angle of 30° with the surface of the roof and to exert a force of 60 lbs. per sq. foot on a flat surface normal to its direction, determine by the graphic method the least admissible cross sectional area of the various portions of the truss, the trusses being spaced 10 ft. apart. Distinguish between ties and struts The weight of the roof and of the truss itself is to be neglected. 40

8. What is the rule regarding the position of the resultant pressure on a horizontal section of a retaining-wall? What would be the effect on the material of the wall at the section if the resultant fell otherwise than according to this rule? 30

A brick-masonary reservoir is to contain 10 ft. depth of water, and the top of the wall is to be 1 foot above the surface of the water. The bed is to be at ground level. The inner face of the reservoir wall is to be vertical, the exterior face is to have a uniform batter, and the wall is to be 2′ 1″ thick at the top. What must be the thickness of the wall at ground-level?

9. A beam of 12 ft. span, supported at the ends, carries four concentrated loads each weighing 1 ton, spaced as follows; the first 2′ from the left-hand support and the remainder at intervals of 3 feet, the last being 1 foot from the right hand support. 30

Draw to scale the curves of (1) shearing forces, (2) bending moments.

10. A uniformly distributed load of w_1 tons per foot run has advanced l feet along a girder of L feet span which weighs w_2 tons per foot run. The total length of the rolling load is greater than L, so that the whole length l is occupied by the rolling load. 40

Obtain general expressions showing the shearing force and bending moment at any section of the girder in (1) the portion occupied by the rolling load (2) the unoccupied portion.

Deduce the value of the maximum bending moment in each portion separately. Calling M_1 the maximum value of the bending moment in the occupied portion, is there a maximum value of M_1 for any value of l between $l = 0$ and $l = L$?

Examiner—MR. G. C. MACONCHY.

The figures in the margin indicate full marks.

1. A and B are two fixed axes, perpendicular to the plane of the paper, 5 feet apart; AD and BE are two rigid links, each 2′ 6″ long, capable of revolving round the axes A and B. At D and E the links are jointed to a rigid frame in the shape of an isosceles triangle of dimensions 33

$$CD = CE = 3' 0''; \; DE = 2' 0''.$$

The axes of the joints at D and E are parallel to the axes at A and B. The frame CDE oscillates on either side of the symmetrical position until the sides CD and CE are alternately perpendicular to a straight line joining AB. Find the position of the instantaneous axis of the frame CDE (1) in its central position (2) in either extreme position.

What should be the length of the links AD and BE and the distance apart of the axes A and B to ensure that the point C may move as nearly as possible in a straight line parallel to AB? Where would the instantaneous axis of the frame be always situated, if the path of C was a true horizontal straight line.

The motion of C being very nearly rectilinear, what would the arrangement be called?

2. What is the object of the fly-wheel of a steam-engine? 33

A non-expansive, single-cylinder, direct-acting, winding-engine exerts a mean useful effort on the crank pin of 31,651 foot lbs. during one-half of each revolution, and 24,617 foot lbs. during the other half of the revolution. At one end of the crank-shaft is keyed the drum, 4 feet in diameter, on which is coiled the chain, which, while the engine is working at normal speed, winds up a weight of 1 ton at a mean speed of π feet per second. At the other end of the crank-shaft is keyed a fly-wheel. The radius of gyration of the fly-wheel being 7 feet, what must be its weight, in order that the fluctuation of its angular velocity may not exceed $\frac{1}{80}$th of the mean angular velocity? The resistance due to the load alone is to be considered, and this may be taken as constant. All other resistances due to friction, &c., to be neglected.

3. The fly-wheel in the last question is made of cast iron. Taking the weight per cubic foot of cast iron to be 444 lbs., and the safe working tensile stress as 3,600 lbs. per sq. inch, at how many revolutions per minute can the engine be worked without causing undue stress in the flywheel? 18

4. When the engine in question 2 is working at normal speed, what is the effective H. P. exerted in raising the load? 33

What would be the effective H. P. exerted on the load when being raised at the extreme speed of question 3?

The diameter of the shaft throughout being 3″, and the aggregate pressure on the bearings in which the shaft revolves 16 tons, what H. P. is required to overcome the frictional resistance of the bearings at normal speed?

The coefficient of friction is to be taken as 0 05.

5. What are the usual proportions of the teeth of a spur-wheel, the pitch being unity? 33

The radius of the pitch-line of a spur-wheel with cycloidal teeth is 4″; the radius of the rolling circle for the faces of the teeth is 1″; the height of the teeth above the pitch-line is ¼″.

Find by construction a circular arc corresponding very nearly with the true epicycloid which gives the proper shape for the face of one tooth

6. Give sketches and descriptions of the action of any three of the following kinds of valves — 33

Flap-valve; India-rubber disc valve; lift or puppet valve; ring-valve; slide-valve; equilibrium-valve; throttle-valve.

7. What are the uses of indicator-diagrams? 33

Sketch (1) a perfect diagram, (2) an actual diagram, of a non-condensing engine, pointing out what portions of the latter relate to the periods of (*a*) admission, (*b*) expansion, (*c*) release, (*d*) compression.

How would the following faults in working affect the shape of the diagram?

(*a*) Opening of steam-valve too late or too slowly.

(*b*) Steam-valve closing too slowly, or steam passages too small.

(*c*) Condensation in the cylinder.

(*d*) Exhaust-valves opening too slowly.

(*e*) Exhaust-valves closing too slowly.

Explain how the indicated H. P. of the engine is obtained from the diagram when the length of stroke, number of revolutions, and scale of pressures are given.

8 The figure represents a horizontal engine, AC being the connecting rod and BC the crank The resultant of all the resistances against which the engine is working may be taken as equivalent to a force W acting at D on a prolongation of the crank-arm, such that DC is equal to CB, the direction of W being at right angles to DCB. CB = 1 foot, AC = 3 feet, W = 1½ tons At the instant under consideration the angle ABC is 30°. 33

Find—

(1) The horizontal pressure P on the piston.

(2) The reaction of the slide-block at A.

(3) The thrust of the connecting-rod.

(4) The reaction of the bearings at B.

Friction to be neglected throughout.

9 A single-threaded worm, turned by a handle of 1′ 6″ radius, drives a wheel with 40 teeth, on the axis of which is keyed a pinion with 15 teeth, which in turn drives a wheel with 50 teeth, on the axis of which is keyed a drum 2′ in diameter. The weight to be lifted is suspended from a chain coiled round the drum 18

What is the velocity-ratio of the power, applied at the handle and the weight, acting at the circumference of the drum?

1. Prove from your reading in Shakespeare that "though he so nicely discriminates, and so minutely describes, the characters of men, he commonly neglects and confounds the characters of ages, by mingling customs ancient and modern, English and foreign." 10

2. Whence did Shakespeare derive the main theme of King Lear; the demonology of the play; the episode of Gloucester and his sons? What purpose is to be assigned to this episode, and to the comic pathos of the Fool? 8

3. "Shakespeare has suffered the virtue of Cordelia to perish in a just cause, contrary to the natural ideas of justice, to the hope of the reader, and to the faith of chronicles." Account for this. Show that "the ethics of the play of King Lear are Stoical ethics." 8

4. Explain the following passages—

a. I do profess to be no less than I seem; to serve him truly that will put me in trust; to love him that is honest; to converse with him that is wise and says little; to fear judgment; to fight when I cannot choose; and to eat no fish. 3

b. Good King, that must approve the common saw! 4
That out of Heaven's benediction com'st
To the warm Sun!
Approach, thou beacon to this under globe,
That by thy comfortable beams I may
Peruse this letter!—Nothing almost sees miracles,
But misery;—I know, 'tis from Cordelia
Who hath most fortunately been inform'd
Of my obscured course; and shall find time
From this enormous state,—seeking to give
Losses their remedies.

c.
Kent. Is this the promis'd end?
Edgar. Or image of that horror?
Albany. Fall and cease!
Lear. This feather stirs; she lives; if it be so,
It is a chance that does redeem all sorrows
That ever I have felt.

5. Assign the probable date of the composition of "Much Ado About Nothing"; account for the title; and point out the sources from which the story is derived. Explain: "I wish some other method had been found to entrap Beatrice than the very one which had before been practised upon Benedick." Examine the characters of Claudio, Benedick, Don John, and Beatrice. 10

6. Write short notes on the following passages—

a. He set up his bills here in Messina, and challenged Cupid at the flight; and my uncle's fool, reading the challenge, subscribed for Cupid, and challenged him at the bird-bolt. 2

b. *Verges.* Marry, Sir, our watch to-night, excepting your Worship's presence, ha' ta'en a couple of as arrant knaves as any in Messina. 4

Dogberry. A good old man, sir; he will be talking: as they say, When the age is in, the wit is out; God help us! it is a world to see! Well said, i' faith, neighbour Verges: well, God's a good man; an two men ride of a horse, one must ride behind. An honest soul, i' faith, sir: by my troth he is, as ever broke bread; But God is to be worshipped: all men are not alike, alas, good neighbour!

Leonato. Indeed, neighbour, he comes too short of you.

Dog. Gifts that God gives.

c. I pray thee, peace. I will be flesh and blood;
For there was never yet philosopher
That could endure the toothache patiently,
However, they have writ the style of gods,
And made a push at chance and sufferance.

7. Show the truth of the following remark in reference to Antony and Cleopatra. "The spirit of the play, though superficially it appear voluptuous, is essentially severe. That is to say, Shakespeare is faithful to the fact." 8

8. Annotate the following passages—

a. Sextus Pompeius 6
Hath given the dare to Cæsar, and commands
The empire of the sea: our slippery people
(Whose love is never link'd to the deserver,
Till his deserts are past,) begin to throw
Pompey the Great and all his diginities
Upon his son; who, high in name and power,
Higher than both in blood and life, stands up
For the main soldier: whose quality, going on,
The sides of the world may danger: Much is breeding
Which, like the courser's hair, hath yet but life,
And not a serpent's poison.

b. *Menas.* These three world-sharers, these competitors 4
Are in thy vessel: Let me cut the cable;
And, when we are put off, fall to their throats:
All there is thine.

Pompey. Ah, this thou shouldst have done,
And not spoke on't! In me 'tis villainy;
In thee it had been good service.

9. Show that "the subject of Coriolanus is the ruin of a noble life through the sin of pride"; and that "the pride of Coriolanus is a passionate self-esteem, and a passionate prejudice of class"

10. Annotate the following passages: mention various readings:—

a. O, me alone! Make you a sword of me?
If these shows be not outward, which of you
But is four Volsces? None of you but is
Able to bear against the great Aufidius
A shield as hard as his. A certain number,
Though thanks to all, must I select from all; the rest
Shall bear the business in some other fight,
As cause will be obey'd. Please you to march;
And four shall quickly draw out my command,
Which men are best inclin'd.

b. The napless vesture of humility.

c. *Menenius* Why, so; you have made good work:
A pair of tribunes that have rack'd for Rome,
To make coals cheap: a noble memory.

Cominius. I minded him, how royal 'twas to pardon.
When it was less expected: He replied,
It was a base petition of a state
To one whom they had punish'd

11 Explain the following passages:—

a. Why should a king be subject to a priest?
Proud Rome, that hatchest such imperial grooms.
With these thy superstitious taper-lights
Wherewith thy antichristian churches blaze
I'll fire thy crazed buildings, and enforce
Thy papal towers to kiss the lowly ground.

b. Would, when I left sweet France, and was embark'd
That charming Circe, walking on the waves
Had changed my shape! or at the marriage-day
The cup of Hymen had been full of poison.

c. *King Edward.* Thus lives old Edward, not relieved by any.
And so must die, though pitied by many.
Oh, wafer, gentle friends, to cool my thirst,
And clear my body from foul excrements!

Matrevis. Here's channel water, as our charge is given:
Sit down, for we'll be barbers to your grace.

But from him or his angels president

What to the smallest tittle thou shalt say
To thy adorers: thou, with trembling fear,
Or like a fawning parasite, obey'st;
Then to thyself ascrib'st the truth foretold.
But this thy glory shall be soon retrench'd.

When the loose mountain trembles from on high,
Shall gravitation cease if you go by?
Or some old temple, nodding to its fall,
For Chartres' head reserve the hanging wall?

Is yellow dirt the passion of thy life?
Look but on Gripus, or on Gripus' wife.

Heaven and earth's Maries over his bow'd shoulder 5

A haggard Anabaptist Many such groups.
The names of Wyatt, Elizabeth, Courtenay,
Nay the queen's right to reign—'fore God, the rogues—
Were freely buzz'd among them.

b *Thirlby* So worshipt of all those that came across him 6
The stranger at his hearth, and all his house—
Mary His children and his concubine, belike.
Thirlby To do him any wrong was to beget
A kindness from him, for his heart was rich,
Of such fine mould, that if you sow'd therein

The seed of hate, it blossom'd Charity.
Pole "After his kind it costs him nothing," there's
An old world English adage to the point.
These are but natural graces, my good bishop,
Which in the Catholic garden are as flowers,
But on the heretic dunghill only weeds.
c. Many points weather'd, many perilous ones,
At last a harbour opens; but therein
Sunk rocks—they need fine steering—much it is
To be nor mad, nor bigot—have a mind—
Not let priests' talk or dream of worlds to be,
Miscolour things about her —sudden touches
For him, or him—sunk rocks; no passionate faith—

Glancing across the Tudor—not so well.

6. Explain the author's meaning:— 18

(a) The relicks of many lie like the ruins of Pompey's in all parts of the earth; and when they arrive at your hands, these may seem to have wandered far, who, in a direct and meridian travel, have but few miles of known earth between yourself and the pole.

(b) Severe contemplators, observing these lasting relicks, may think them good monuments of person's past, little advantage to future beings; and considering that power which subdueth all things to itself, that can resume the scattered atoms, or indentify out of anything, conceive it superfluous to expect a resurrection out of relicks; but the soul subsisting, other matter, clothed with due accidents, may solve the individuality.

(c) While we look for incorruption in the heavens, we find that they are but like the earth;—durable in their main bodies, alterable in their parts; whereof, beside comets and new stars, perspectives begin to tell tales, and the spots that wander about the the sun, with Phaeton's favour, would make clear conviction.

7. Write a few remarks on the close connection, in De Quincey's essays, between style and thought 8

8. Express briefly the thoughts suggested by the following passages:— 8

(a) It is no less to the honour of the great Triumvir, that a strength of colouring should survive in his character capable of baffling the wrongs and ravages of time; capable of forcing its way by mere weight of metal through a tract of sixteen hundred and odd years to the notice of one immortal eye that could read its true lineaments and proportions.

(b) The amphitheatre extinguished the theatre.

(*a*) Immense improvement! says the well-regulated mind, which unintermittingly rejoices in the New Police, the Tithe Commutation Act, the Penny-post and all guarantees of human advancement, and has no moments when conservative reforming intellect takes a nap, while imagination does a little Toryism, by the sly, revelling in regret that dear, old, brown, crumbling, picturesque inefficiency is everywhere giving place to spick-and-span, new painted, new varnished efficiency, which will yield endless diagrams, plans, elevations, and sections, but alas! no picture.

(*b*) Depend upon it, you would gain unspeakably if you would learn with me to see some of the poetry and the pathos, the tragedy and the comedy, lying in the experience of a human soul and that looks out through dull grey eyes, and that speaks in a voice of quite ordinary tones.

2 On what grounds does Mill maintain that the development of Individuality is a good to the individual himself and to society at large? 12

3 Examine the claims put forth on behalf of Democracy, 18

(*a*) That it is more active than other forms of government in reforming legislation.

1. Explain fully Pánini's Aphorism, अकथितञ्च. Name specifically the roots to which this rule is intended to apply Why are these roots divided into two classes? What is the reason of the name अकथित as applied to one of the two objects of the said roots? Is गो दुग्धं दोग्धि equally correct with गां दुग्धं दोग्धि Give reasons for your answer.

2. State the rules, together with the exceptions, relating to the use of षष्ठी in कर्त्ता or कर्म्म, when in conjunction (योग) with a कृत् प्रत्यय. How would you maintain the correctness of expressions like नरकस्य जिष्णुः ?

3. Expound the विग्रहवाक्य of the compound word पराधीन, citing the Aphorism which applies to the *samása*, and also the rule for adding the तद्धित affix.

4. When does the word छाया become neuter at the end of a compound? State and reconcile the seemingly contradictory rules of Pánini on this point.

5. Cite and explain the rule for forming सूर्य्याचन्द्रमसौ in lieu of सूर्य्यचन्द्रमसौ In what cases is the said rule inapplicable? How does Bhattoji deduce the limitation of the rule from the words of the Aphorism that gives the said rule?

6. What is a स्थायिभाव, and what a व्यभिचारिभाव? How many of each are there? Name them and define the following:—शोक, उत्साह, दैन्य, मति अवहित्था, and वितर्क.

7. How is a दोष, or defect defined? How many classes of them are there? Name these classes, and shew how the general definition applies to each class. Is there any defect in the following stanza, because the negative particle used in each line does not form a समास ?

An assemblage of such troops never stood the heavy charge of a body of Moguls, but dispersed at once, and scampered off singly to the nearest hills or broken ground. If the enemy left their ranks to pursue them, they cut off single horsemen, or rapidly assembled behind a ravine, or in some other situation where it was not safe for small parties to attack them; and, when the disheartened pursuers turned back with their horses exhausted, the Marattas were upon them in a moment, charged in on them, if there was an opening or confusion, but generally hung loosely on their flanks and rear, sometimes dashing up singly to fire their matchlocks into the mass, or even to despatch a straggler with their long spears. Their chief excellence, as well as their delight, was in the plunder of a convoy. The favour of the country people gave them full information, while it kept the Moguls in darkness, till they were suddenly assailed on the line of march, and saw the camels and cattle, carrying the grain and stores they were escorting, swept off in a moment.

Fortune, however, seemed determined that of these bitterness we should not taste; for the next morning, bright and joyous overhead bent the blue unclouded heaven; while the plain lay gleaming at our feet in all the brilliancy of enamel. I was sorely tempted to linger another day in the neighbourhood; but we have already spent more time upon the Geysirs than I had counted upon, and it will not do to remain in Iceland longer than the 15th, or Winter will have begun to barricade the passes into his Arctic dominions. My plan, on returning to Reykjavik, is to send the schooner round to wait for us in a harbour on the north coast of the island, while we ourselves strike straight across the interior on horseback.

The fruits of a long peace perished under the rude grasp of the Barbarians, and they themselves were incapable of tasting

the more elegant refinements of luxury which had been prepared for the use of the soft and polished Italians: Each soldier, however, claimed an ample portion of the substantial plenty, the corn and cattle, oil and wine that was daily collected and consumed in the Gothic camp. The trembling captives, sons and daughters of Roman Senators, presented in goblets of gold and gems, large draughts of wine to the haughty victors who stretched their huge limbs under the shade of plane-trees, artificially disposed to exclude the scorching rays of the Sun.

The prostrate South to the destroyer yields
Her boasted titles and her golden fields:
With grim delight the brood of winter grow
A brighter day and skies of azure hue;
Scent the new fragrance of the opening rose
And quaff the pendant vintage as it grows.

(a) Although I never had the pleasure of seeing Prince Napoleon before, I should have known him among a thousand, from his remarkable likeness to his uncle, the first Emperor. A stronger resemblance, I conceive, could scarcely exist between two persons. The same delicate, sharply cut features, thin refined mouth, and firm determined jaw. The Prince's frame, however, is built altogether on a larger scale, and his eyes, instead of being of a cold piercing blue—are soft and brown, with quite a different expression.

(b) On rising from table, each one strolled away in whatever direction his particular taste suggested. The painter to sketch; the geologist to break stones; the philosopher to moralize, I presume—at least, he lighted a cigar,—and the rest to superintend the erection of the tents which had just arrived.

2. Prove (1) the theorem of Gauss that the mean potential over a spherical surface due to matter entirely outside the sphere is equal to the potential at the centre of the sphere; (2) that the potential at any point outside a cylinder of uniform distribution of matter over the surface of the cylinder, or throughout its interior, is the same as if all the matter were uniformly distributed along its axis.

Explain the meaning of the coefficients of the charges in the linear function and prove the relation $p_{rs} = p_{sr}$.

5. From theoretical considerations show that a small magnetic body in a magnetic field will move towards the strongest part of the field and a diamagnetic body towards the weakest. If R is the resultant magnetic force at the position occupied by the body and K is the coefficient of magnetisation, prove that the force acting on the small body tending to move it is $\frac{1}{2}$ K $\frac{dR^2}{dx}$.

Give Faraday's arguments in favour of his statements.—(1) When metals of different kinds connected in one circuit are equally subject in every circumstance to electro-magnetic induction, they exhibit exactly equal powers with respect to the currents which either are formed, or tend to form, in them. (2) The

currents produced by magneto-electric induction in bodies are proportional to their conducting powers.

7. How did Faraday establish his proposition, that the electricity which decomposes, and that which is evolved by the decomposition of, a certain quantity of matter, are alike?

(*a*) A writer on Thermodynamics says :—"The usual thermal unit is defined as the amount of heat required to raise unit mass of water from the temperature of melting ice through one degree C of temperature measured on the air-thermometer, and it is called a *caloric* In this definition it is necessary to mention the initial temperature, as M Regnault's experiments shew that $\theta + 0\ 00002\theta^2 + 0\ 0000003\theta^3$, or according to later calculations by M Bosscha, $\theta + 0{\cdot}00011\theta^2$ is the heat required to raise one gram of water from the temperature of melting ice through θ degrees C and hence that $1 + 0\ 00022\ \theta$ is the amount required to raise the same mass at θ° C through one degree The real calculation gives $+1{,}00011$ instead of 1 for the term independent of θ This is merely because the first formula is empirical, and thus not quite accurate, the difference is negligible" Is there anything remarkable in this extract?

(*b*) A writer on Hydrostatics says —"If the pressure over the plane be variable, we may suppose the area a made so small that the pressure shall be sensibly uniform, and in this case P will be small as well as a, but $\frac{P}{a}$ or p will measure the rate of pressure at the point Or we may say that p, the pressure at the point, *i e.*, the rate of pressure per unit area, is the limiting value of $\frac{P}{a}$, when a,

and therefore P, are indefinitely diminished." Have you any remarks to make on this extract?

(*c*). The late Professor Bain says, ["Logic Deduction," page 88]:—"Polarization and Double Refraction are co-extensive properties." Is this so?

(*d*). Professor Tyndall says, ["Sound," page 14]:—"In fact, every experiment on the reflection of light has its analogy in the reflection of sound." Is this so?

(*e*). Professor Bain says, ["Logic Induction," page 131]:—concerning the Wave Theory of Light:—"We cannot positively affirm that no other supposition will explain the facts; what we can say is that of all hypotheses hitherto suggested this approaches the nearest to an exact explanation. Newton's corpuscular hypothesis is admitted to have broken down on *Interference*; and there is at the present day, no rival." Why do the phenomena of Interference preclude the possibility of light being a form of energy? Recollect there is a permanence of energy as well as a permanence of matter.

(*f*). There is an Interference experiment however, which affords an *experimentum crucis* between these theories; yet the same *experimentum crucis* is obtained by experiments independent of Interference. Can you explain this statement?

(*g*). Mr. Spencer says:—"Think you that a drop of water which to the vulgar eye is but a drop of water, loses anything in the eye of the physicist who knows that its elements are held together by a force, which, if suddenly liberated, would produce a flash of lightning." Can you explain the meaning of this extract?

(*h*). Maxwell says ["Heat," page 215]:—"If light is a substance, there cannot be another substance which when added to it shall produce darkness. We are therefore compelled to admit that light is not a substance." Why so? Instead of the term "substance" substitute "form of energy" in this extract and state the result?

(*i*). Maxwell again says:—"Now there is nothing absurd in one motion being the exact opposite of another, though the supposition that one substance is the exact opposite of another substance, as in some forms of the Two-fluid theory of Electricity, is an absurdity." Suppose now a man were to say, corresponding to these equal and opposite motions there are two Kinetic energies, and since light is a form of energy, it is with them we have to deal, and it is as difficult for us to consider them as cancelling one another as it is for us to consider one substance as the exact opposite of another substance. Have you anything to say?

(*j*). In Stoke's well-known exposition of the doctrine of Fraunhöfer's lines there occurs:—"It is evident that such a medium, one being agitated, would give out the note above-mentioned, while, on the other hand, if the note were sounded in air at a distance the incident vibrations would throw the strings into vibration, and consequently would themselves be gradually extinguished, since otherwise there would be a creation of *vis viva*, that is, of Kinetic energy." Suppose now a person said:—Will not the strings themselves emit the note referred to, and will not the sonorous energy now radiated be equal to that absorbed; how then can the presence of the strings effect the question? How would you reply?

(k). In examining with a spectroscope white light which has passed through the flame of a spirit lamp with a salted wick, determine the condition requisite in order that the dark D line may appear.

(l). Light having passed through a polariser, a doubly refracting crystal and an analyser, falls on a screen, thus producing a certain illumination, the analyser is now rotated through 90°, and a new illumination is produced. Where is now the luminous energy which was on the screen in the first position of the analyser?

(m). Professor Tyndall says [Notes on Light, page 69]:—"In one particular case the ellipse in which the individual particles of ether move is converted into a circle This occurs when one of the systems of waves is an exact quarter of an undulation behind the other." Is this so?

(n). "In the case of a medium simultaneously disturbed by two sources of similar vibrations, we have seen that the amplitude of the resultant vibration at any point P is determined by the equation —

$$A^2 = a_1^2 + a_2^2 + 2a_1 a_2 \cos \delta$$

where δ is the phase difference of the vibrations reaching P, etc. The average value of A^2 throughout the whole medium will be $a_1^2 + a_2^2$, or the sum of the average energies of the vibrations excited by the sources acting separately" Explain this extract.

Omnis circa se largissime persecutus, nihil prius aut acrius monuit quam ne quid sordide facerent. Relictas sibi hereditates ab iis, quibus liberi erant, non recepit. Legatum etiam ex testamento Rusci Caepionis, qui caverat ut quot annis ingredientibus curiam senatoribus certam summam viritim praestaret heres suus, irritum fecit. Reos, qui ante quinquennium proximum apud aerarium pependissent, universos discrimine liberavit, nec repeti nisi intra annum eaque conditione permisit, ut accusatori qui causam non teneret exilium poena esset. Scribas quaestorios negotiantis, ex consuetudine sed contra Clodiam legem, venia in praeteritum donavit. Subsiciva, quae divisis per veteranos agris carptim superfuerunt, veteribus possessoribus ut usu capta concessit. Fiscales calumnias magna calumniantium poena repressit, ferebaturque vox ejus: "Princeps qui delatores non castigat, irritat."

(C). Quisquis est Deus, si modo est alius, et quacunque in parte, totus est sensus, totus visus, totus auditus, totus animae, totus animi, totus sui. Innumeros quidem credere, atque etiam ex virtutibus vitiisque hominum, aut, ut Democrito placuit, duos omnino, majorem ad socordiam accedit Verum Deos agere curam rerum humanarum credi, ex usu vitae est: poenasque maleficiis aliquando seras, occupato Deo in tanta mole, nunquam autem irritas esse; nec ideo proximum illi genitum, hominem, ut vilitate juxta belluas esset. Imperfectae vero in homine naturae praecipua solatia, ne Deum quidem posse omnia Namque nec sibi potest mortem consciscere, si velit, quod homini dedit optimum in tantis vitae poenis · nec mortales aeternitate donare, aut revocare defunctos: Nec facere, ut qui vixit, non vixerit; qui honoris gessit, non gesserit: nullumque habere in praeterita jus, praeterquam oblivionis: per quae declaratur haud dubie naturae potentia, idque esse quod Deum vocamus.

(D). De republica quid ego tibi subtiliter? Tota periit, atque hoc est miserior, quam reliquisti, quod tum videbatur ejusmodi dominatio civitatem oppressisse, quae jucunda esset multitudini, bonis autem ita molesta, ut tamen sine pernicie: nunc repente tanto in odio est omnibus, ut quorsus eruptura sit horreamus. Nam iracundiam atque intemperantiam illorum sumus experti, qui Catoni irati omnia perdiderunt. Sed ita lenibus uti videbantur venenis, ut posse videremur sine dolore interire. Nunc vero sibilis vulgi, sermonibus honestorum, fremitu Italiae vereor ne exarserit. Equidem, sperabam, ut saepe etiam loqui tecum solebam, sic orbem reipublicae esse conversum, ut vix sonitum audire, vix impressam

orbitam videre possemus: et fuisset ita, si homines transitum tempestatis expectare potuissent; sed quum diu occulte suspirassent, postea jam gemere, ad extremum vero loqui omnes et clamare coeperunt.

Igitur distrahi cohortes ambitu duorum, et, si ab uno regerentur, intentiorem fore disciplinam adseverante uxore, transfertur regimen cohortium ad Burrum Afranium egregiae militaris famae, gnarum tamen cujus sponte praeficeretur. Suum quoque fastigium Agrippina extollere altius: carpento Capitolium ingredi, qui honos sacerdotibus et sacris antiquitus concessus venerationem augebat feminae, quam imperatore genitam, sororem ejus qui rerum potitus sit et conjugem et matrem fuisse, unicum ad hunc diem exemplum est Inter quae praecipuus propugnator ejus Vitellius, validissima gratia, aetate extrema (adeo incertae sunt potentium res) accusatione corripitur, deferente Junio Lupo senatore Is crimina majestatis et cupidinem imperii objectabat, praebuissetque aures Caesar, nisi Agrippinæ minis magis quam precibus mutatus esset, ut accusatori aqua atque igni interdiceret. Hactenus Vitellius voluerat.

LATIN IV.

Examiner—Mr. H. M. Percival, M. A.

I. Translate into Latin Prose:—

If peradventure, reader, it has been thy lot to waste the golden years of thy life—thy shining youth—in the irksome confinement of an office; to have thy prison days prolonged through middle age down to decripitude and silver hairs, without hope of release or respite; to have lived to forget that there are such things as holidays, or to remember them but as the prerogatives of childhood; then and then only will you be able to appreciate my deliverance. It is now six-and-thirty years since I took my seat at the desk in Mincing Lane. Melancholy was the transition at fourteen from the abundant playtime and the frequently intervening vacations of school-days to the eight, nine, and sometimes ten hours' a day attendance at the counting-house. But time partially reconciles us to anything. I gradually became contented, doggedly contented, as wild animals in cages .....But now I am no longer clerk to the firm of Boldero, Merryweather and Co. I am Retired Leisure. I am to be met with in trim gardens. I am already come to be known by my vacant face and careless gesture, perambulating at no fixed pace, nor with any settled purpose. They tell me a certain *cum dignitate* air, that has been buried so long with my other good parts, has begun to shoot forth in my person. I grow into gentility perceptibly. When I take up a newspaper it is to read the state of the opera. I have done all that I came into this world to do. I have worked taskwork, and have the rest of the day to myself.

II. Turn into Latin Alcaics *or* Sapphics:—

Gather ye rose-buds while ye may:
  Old time is still a-flying;
And this same flower that smiles to-day,
  Tomorrow will be dying.
The glorious lamp of heaven, the Sun,
  The higher he's a-getting,
The sooner wll his race be run
  And nearer he's to setting.
